The Soybean Through World History Matilda Baraibar Norberg, Lisa Deutsch, 2023-06-30 This book examines the changing roles and functions of the soybean throughout world history and discusses how this reflects the complex processes of agrofood globalization. The book uses a historical lens to analyze the processes and features that brought us to the current global configuration of the soybean commodity chain. From its origins as a peasant food in ancient China today the protein rich soybean is by far the most cultivated biotech crop on Earth used to make a huge variety of food and industrial products including animal feed, tofu, cooking oil, soy sauce, biodiesel, and soap. While there is a burgeoning amount of literature on how the contemporary global soy web affects large tracts of our planet's social ecological systems, little attention has been given to the questions of how we got here and what alternative roles the soybean has played in the past. This book fills this gap and demonstrates that it is impossible to properly comprehend the contemporary global soybean chain or the wider agrofood system of which it is a part without looking at both their long and short historical development. However, a history of the soybean and its changing roles within equally changing agrofood systems is inexorably a history about globalization. Not only does this book map out where soybeans are produced but also who governs, wields power, and accumulates capital in the entire commodity chain from inputs in production to consumption as well as identifying the institutional context the global commodity chain operates within. The book concludes with a discussion of the main challenges and contradictions of the current soy regime that could trigger its rupture and end. This book is essential reading for students, practitioners, and scholars interested in agriculture and food systems, global commodity chains, globalization, environmental history, economic history, and social ecological systems.

Pandemic Risk, Response, and Resilience Indrajit Pal, Rajib Shaw, 2022-05-20 *Pandemic Risk: Response and Resilience* COVID-19 Responses in Cities Around the World examines the pandemic's global impacts on public health, economies, society, and labor. The book shows how COVID-19 intensified natural and anthropogenic hazards and destroyed years of communities, governments, and the work of development organizations and their investments. It focuses on how disaster resilience is central to achieving the 2030 Sustainable Development Goals in a post-COVID-19 era. Sections cover current governance practices with special attention given to Asia's more successful responses. It shows how the various sectors across that society were most impacted by COVID-19, including tourism and food systems. This book is an essential reference for researchers and practitioners who need to understand response, preparedness, and future pathways.

State Responses to Nuclear Proliferation Brian K. Chappell, 2021-01-07 Contemporary fears of rogue state nuclear proliferation and nuclear terrorism pose unique challenges for the global community This book offers a unique approach by examining why states that have the military capability to severely damage a proliferating state's nuclear program instead choose to pursue coercive diplomacy The author argues cognitive psychological influences including the trauma derived from national tragedies like the September 11th attacks and the Holocaust and a history of armed conflict increase the threat perceptions of foreign policy decision makers when confronting a state perceived to be challenging the existing power structure by pursuing a nuclear weapon The powerful state's degree of perceived threat combined with its national security policies military power projection capabilities and

public support then influence whether it will take no action use coercive diplomacy sanctions or employ military force to address the weaker state s nuclear ambitions
