Treleaven, 2016-06-28 Many Christians continue to be skeptical about Charles Darwin and the theory of evolution by natural selection But imagine there were reasons that Christians would want to embrace Darwin in a bear hug and Darwinism become Christianity s new best friend This seemingly preposterous idea is the heart of this book The author identifies five key reasons why Christians ought to love Darwin what he said and the implications of his ideas The author demonstrates why BOTH the Bible and conventional modern science can

be correct at the same time how BOTH reinforce fundamental Christian doctrine and the surprising implications for Christians and non Christians alike

History 4° Celsius Ian Baucom,2020-07-24 In History 4 Celsius Ian Baucom continues his inquiries into the place of the Black Atlantic in the making of the modern and postmodern world Putting black studies into conversation

with climate change Baucom outlines how the ongoing concerns of critical race diaspora and postcolonial studies are crucial to understanding the Anthropocene He draws on materialist and postmaterialist thought Sartre and the science of climate change to trace the ways in which evolving political cultural and natural history converge to shape a globally destructive force Identifying the quest for limitless financial gain as the primary driving force behind both the slave trade and the continuing increase in global greenhouse gas emissions Baucom demonstrates that climate change and the conditions of the Black Atlantic colonialism and the postcolony are fundamentally entwined In so doing he argues for the necessity of establishing a method of critical exchange between climate science black studies and the surrounding theoretical inquiries of humanism and posthumanism

Double Helix History Jerome De Groot, 2022-08-29 Double Helix History examines the interface between genetics and history in order to investigate the plausibility of new knowledge derived from scientific methods and to reflect upon what it might mean for the practice of history Since the mapping of the human genome in 2001 there has been an expansion in the use of genetic information for historical investigation Geneticists are confident that this has changed the way we know the past This book considers the practicalities and implications of this seemingly new way of understanding the human past using genetics It provides the first sustained engagement with these so called genomic histories The book investigates the ways that genetic awareness and practice is seemingly changing historical practice and conceptualisation Linking six concepts Public Practice Ethics Politics Self and Imagination Double Helix History outlines the ways that genetic information being postgenomic the public life of DNA and the genetic historical imaginary work on the body on collective memory on the historical imagination on the ethics of historical investigation on the articulation of history and on the collection and interpretation of data regarding the past This book will appeal to researchers and students alike interested in DNA genetics and historiography

Human Rights in the Media Michelle Farrell, Eleanor Drywood, Edel Hughes, 2019-01-03 This collection sets about untangling some of the knotty issues in the underexplored relationship between human rights and the media We investigate how complex debates in political judicial academic and public life on the role and value of human rights are represented in the media particularly in print journalism To focus the discussion we concentrate on media representation of the controversial proposals in the United Kingdom to repeal the Human Rights Act 1998 and to replace it with a British Bill of Rights The collection is underpinned by the observation that views on human rights and on the proposals to repeal and replace are polarised On the one hand human rights are presented as threatening and therefore utterly denigrated on the other hand human rights are idolised and therefore uncritically celebrated This is the fear and fetish in our title The media plays a decisive role in constructing this polarity through its representation of political and ideological viewpoints In order to get to grips with the fear the fetish and this complex interrelationship the collection tackles key contemporary themes amongst them the proposed British Bill of Rights Brexit prisoner voting the demonisation of immigrants press freedom tabloid misreporting trial by media and Magna Carta The collection explores media representation

investigates media polarity and critiques the media's role

Shadows of Being Jeffrey Andrew Barash, 2022 In a review of the work of Karl Jaspers composed several years before the publication of his book *Being and Time* Martin Heidegger suggested that the philosophical orientations of his period had made a wrong turn and skirted by the fundamental path of thought He suggested that instead of taking up a heritage of original questions his contemporaries had become preoccupied with secondary issues accepting as fundamental what was in fact only incidental In the years that followed Heidegger's promise to reorient philosophy in terms of the *Seinsfrage* the question of Being exercised a well known influence on successive generations of thinkers on a global scale The present book delves into the philosophical sources of this influence and raises the question whether Heidegger indeed made good on the promise to reveal for thought what is truly fundamental In proposing this investigation the author assumes that it is not sufficient to take Heidegger at his word but that it is necessary to scrutinize what is posited as fundamental in light of its broader implications above all for ethico political judgment and for historical reflection After addressing this question in the first part of the book the second part examines the significance of Heidegger's reorientation of philosophy through the prism of its critical reception in the thought of Hannah Arendt Emmanuel Levinas and Paul Ricoeur

Decoloniality and Epistemic Justice in Contemporary Community

Psychology Garth Stevens, Christopher C. Sonn, 2021-09-20 This book examines the ways in which decolonial theory has gained traction and influenced knowledge production praxis and epistemic justice in various contemporary iterations of community psychology across the globe With a notable Southern focus although not exclusively so the volume critically interrogates the biases in Western modernist thought in relation to community psychology and to illuminate and consolidate current epistemic alternatives that contribute to the possibilities of emancipatory futures within community psychology To this end the volume includes contributions from community psychology theory and praxis across the globe that speak to standpoint approaches e.g. critical race studies queer theory indigenous epistemologies in which the experiences of the majority of the global population are more accurately reflected address key social issues such as the ongoing racialization of the globe gender class poverty xenophobia sexuality violence diasporas migrancy environmental degradation and transnationalism globalisation and embrace forms of knowledge production that involve the co construction of new knowledges across the traditional binary of knowledge producers and consumers This book is an engaging resource for scholars researchers practitioners activists and advanced postgraduate students who are currently working within community psychology and cognate sub disciplines within psychology more broadly A secondary readership is those working in development studies political science community development and broader cognate disciplines within the social sciences arts and humanities

The Legacy of Vico in Modern Cultural History Joseph Mali, 2012-09-06 In this highly original study Joseph Mali explores how four attentive and inventive readers of Giambattista Vico's *New Science* 1744 the French historian Jules Michelet 1798 1874 the Irish writer James Joyce 1882 1941 the German literary scholar Erich Auerbach 1892

1957 and the English philosopher Isaiah Berlin 1909-97 came to find in Vico's work the inspiration for their own modern theories or in the case of Joyce stories of human life and history. Mali's reconstruction of the specific biographical and historical occasions in which these influential men of letters encountered Vico reveals how their initial impressions and interpretations of his theory of history were decisive both for their intellectual development and their major achievements in literature and thought. This new interpretation of the legacy of Vico's *New Science* is essential reading for all those engaged in the history of ideas and modern cultural history.

The French Revolution and Its Legacy Camil Francisc Roman, 2025-06-30

This book offers an interpretation of the French Revolution and modern democracy arguing that the revolution gave rise to a democratic power that is liminal by nature and therefore unlimited, unaccountable on principle and the basis for a state religion of continuous transformation. It demonstrates these claims by focusing on the universally adulated but little understood sacred motto *liberté, égalité, fraternité* and on the sacrifice and role of Louis XVI in the revolution. Analysing the revolutionary process by which representative democratic government took the shape of political metamorphosis, the book shows that modern democracy does not represent the people but refers to the representation of representation and the existential condition of permanent displacement. The present study will appeal to scholars from across the social, political and human sciences with an interest in the French Revolution, modern democracy, political modernity, contemporary politics and the history of art.
