**Critical Ancient World Studies** Mathura Umachandran, Marchella Ward, 2023-12-27 This volume explores and elucidates critical ancient world studies CAWS a new model for the study of the ancient world operating critically setting itself against a long history of a discipline formulated to naturalise a hierarchical white supremacist origin story for an imagined modern West CAWS is a methodology for the study of antiquity that shifts away from the assumptions and approaches of the discipline known as classical studies and or classics Although it seeks to reckon with the discipline's colonial history it is not simply the application of decolonial theory or the search to uncover subaltern narratives in a subject that has special relevance to the privileged and powerful Rather it dismantles the structures of knowledge that have led to this privileging and questions the categories ideas themes narratives and epistemological structures that have been deemed objective and essential within the inherited discipline of classics The contributions in this book by an international group of researchers offer a variety of situated embodied perspectives on the question of how to imagine a more critical discipline rather than a unified single view The volume is divided into four parts Critical Epistemologies Critical Philologies Critical Time and Critical Space and Critical Approaches and uses these as spaces to propose disciplinary transformation Critical Ancient World Studies The Case for Forgetting Classics is a must read for scholars and practitioners teaching in the field of classical studies and the breadth of examples also makes it an invaluable resource for anyone working on the ancient world or on confronting Eurocentrism within other disciplines The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

**Third World Studies** Gary Y. Okihiro, 2016-07-28 In 1968 the Third World Liberation Front at San Francisco State College demanded the creation of a Third World studies program to counter the existing curricula that ignored issues of power notably imperialism and oppression The administration responded by institutionalizing an ethnic studies program Third World studies was over before it began Detailing the field's genesis and premature death Gary Y Okihiro presents an intellectual history of ethnic studies and Third World studies and shows where they converged and departed by identifying some of their core ideas concepts methods and theories In so doing he establishes the contours of a unified field of study Third World studies that pursues a decolonial politics by examining the human condition broadly especially in regard to oppression and critically

analyzing the locations and articulations of power as manifested in the social formation Okihiro's framing of Third World studies moves away from ethnic studies liberalism and its U.S. centrism to emphasize the need for complex thinking and political action in the drive for self-determination *The Oxford Handbook of Global Studies* Mark Juergensmeyer, Saskia Sassen, Manfred B. Steger (eds), 2019 Since the end of the Cold War globalization has been reshaping the modern world and an array of new scholarship has risen to make sense of it in its various transnational manifestations including economic social cultural ideological technological environmental and in new communications The chapters discuss various aspects in the field through a broad range of approaches This handbook focuses on global studies more than on the phenomenon of globalization itself although the various aspects of globalization are central to understanding how the field is currently being shaped
