Cultural Forests of the Amazon William Balée, 2013-08-20 Winner of the Society for Economic Botany's Mary W Klinger Book Award Cultural Forests of the Amazon is a comprehensive and diverse account of how indigenous people transformed landscapes and managed resources in the most extensive region of tropical forests in the world Until

recently most scholars and scientists as well as the general public thought indigenous people had a minimal impact on Amazon forests once considered to be total wildernesses William Bal e s research conducted over a span of three decades shows a more complicated truth In Cultural Forests of the Amazon he argues that indigenous people past and present have time and time again profoundly transformed nature into culture Moreover they have done so using their traditional knowledge and technology developed over thousands of years Bal e demonstrates the inestimable value of indigenous knowledge in providing guideposts for a potentially less destructive future for environments and biota in the Amazon He shows that we can no longer think about species and landscape diversity in any tropical forest without taking into account the intricacies of human history and the impact of all forms of knowledge and technology Bal e describes the development of his historical ecology approach in Amazonia along with important material on little known forest dwellers and their habitats current thinking in Amazonian historical ecology and a narrative of his own dialogue with the Amazon and its people **AP**

Moundbuilders of the Amazon Anna Curtenius Roosevelt, 1991 Moundbuilders of the Amazon shows that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Additionally the comprehensive use of such techniques by all archaeologists doing fieldwork anywhere could revolutionize archaeology allowing archaeologists to look inside sites rather than simply excavate them Using a variety of remote sensing techniques Roosevelt documents the existence of a major moundbuilding culture possessing monumental architecture and a rich artistic tradition on the lowland tropical floodplain of Marajo Island at the mouth of the Amazon River in Brazil from about 400 A.D. to about 1300 A.D. Marajo Island at the mouth of the Amazon River is about the same size as Switzerland or Belgium A well developed civilization existed there from about 400 A.D. to 1300 A.D. comparable in many ways to the Inca civilization to the west or to the Aztec and Maya cultures to the north or in some interesting ways to the Pharaonic cultures which developed at the mouth of the Nile Because this civilization had no stone at its disposal it expressed its monumental architecture in packed dirt which washed back into the alluvial floodplain long ago effectively preventing archaeological discovery until the recent development of sophisticated techniques of remote sensing and reconstruction Key Features Reports on the most extensive stratigraphic excavations ever of an ancient Amazonian civilization adapted to a floodplain environment Introduces the first use of geophysics for archaeology in non specialized language Illustrates for the first time the elaborate art of a complex society that was indigenous to the tropical lowlands Describes monumental sites rich

polychrome pottery and the first extensive biological remains ever recovered in an Amazonian site Proves that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Shows that the comprehensive use of such methods could revolutionize archaeology by allowing archaeologists to look inside sites rather than simply excavate them Provides examples which prove that the theories about the limitations of the tropical environment for cultural evolution are simply untrue and were based on faulty knowledge of the region and its archaeology

Confucianism as a World Religion Anna Sun, 2013-04-21 Is Confucianism a religion If so why do most Chinese think it isn't From ancient Confucian temples to nineteenth century archives to the testimony of people interviewed by the author throughout China over a period of more than a decade this book traces the birth and growth of the idea of Confucianism as a world religion The book begins at Oxford in the late nineteenth century when Friedrich Max Müller and James Legge classified Confucianism as a world religion in the new discourse of world religions and the emerging discipline of comparative religion Anna Sun shows how that decisive moment continues to influence the understanding of Confucianism in the contemporary world not only in the West but also in China where the politics of Confucianism has become important to the present regime in a time of transition Contested histories of Confucianism are vital signs of social and political change Sun also examines the revival of Confucianism in contemporary China and the social significance of the ritual practice of Confucian temples While the Chinese government turns to Confucianism to justify its political agenda Confucian activists have started a movement to turn Confucianism into a religion Confucianism as a world religion might have begun as a scholarly construction but are we witnessing its transformation into a social and political reality With historical analysis extensive research and thoughtful reflection Confucianism as a World Religion will engage all those interested in religion and global politics at the beginning of the Chinese century
