Thoughts on War Phillip S. Meilinger, 2020-03-17 War is changing Unlike when modern military doctrine was forged the United States no longer mobilizes massive land forces for direct political gain Instead the US fights small overseas wars by global mandate to overthrow dictators destroy terrorist groups and broker regional peace These conflicts hardly resemble the total wars fought and expected by foundational military theorists such as Carl von Clausewitz yet their paradigms are ingrained in modern thinking The twenty first century s new geopolitical situation demands new principles for warfare deemphasizing decisive land victory in favor of airpower intelligence systems and indigenous ground forces In Thoughts on War Phillip S Meilinger confronts the shortcomings of US military dogma in search of a new strategic doctrine Inter service rivalries and conventional theories failed the US in lengthy Korea Vietnam and Middle East conflicts Jettisoning traditional perspectives and their focus on decisive battles Meilinger revisits historical campaigns looking for answers to more persistent challenges how to coordinate forces manipulate time and fight on two fronts This provocative collection of new and expanded essays offers a fresh if controversial perspective on time honored military values one which encourages a critical revision of US military strategy

Activity, Diet and Social Practice

Sarah Schrader, 2018-12-05 Day to day activities are important in the development of social identities the establishment of social standing and the communal understanding of societal rules This perspective is broadly referred to as practice theory and relates to the power of an overarching social structure and the individual actors that exist within it Practice theory has made an important contribution to anthropological and archaeological research as these fields are particularly interested in daily life and the importance of these actions This volume argues that practice theory can also be used in a bioarchaeological context through the examination of human skeletal remains and the archaeological context in which they were excavated Bioarchaeology offers a unique perspective on these day to day experiences skeletal tissue is constantly undergoing a process of change and as a living biological system it can adapt to external forces Furthermore bioarchaeological studies are multi scalar and can examine individuals groups or entire populations Using osteological indicators of activity patterns enthesal changes osteoarthritis and dietary isotopes carbon nitrogen as examples this book addresses patterns of everyday life in the ancient past Physical activities and food consumption are actions that are carried out on a daily basis While bioarchaeology does not have the ability to recreate specific day to day activities we can assess broad trends in everyday life The volume illustrates these points using examples from the Ancient Nile Valley Through the examination of over 800 Egyptian and Nubian individuals from five different archaeological sites the research addresses patterns of everyday life as they relate to social inequality agency and practice Beyond osteological indicators of activity and dietary patterns this book also discusses additional methods that can be pursued to draw attention to daily life Lastly this book also highlights the applicability of and potential contribution that practice theory can make to this area of research

Early Maritime Cultures in East Africa and the Western Indian Ocean Akshay Sarathi, 2018-11-30 This volume represents a multi disciplinary effort to examine East Africa and the Western Indian Ocean Multiple lines of evidence drawn from linguistics archaeology history art history and ethnography come together in novel ways to highlight different aspects of the region s past and offer innovative avenues for future research

Agroecosystems K. R. Krishna, 2013-12-04 Comprised of three sections this covers the nutrient dynamics and productivity of global agroecosystems It focuses on the major aspects that make up agroecosystems such as soils climate crops nutrient dynamics and productivity It introduces agroecosystems and describes global soil types that support vast crop belts then deals with the principles that drive crop growth nutrient dynamics and ecosystematic functions within any agroecosystem It also details the influence of agronomic practices and factors such as soil microbes organic matter crop genetic nature irrigation weeds and cropping systems that affect productivity of agroecosystems

Europe and the Americas Jeremy Smith, 2006-08-01 This volume takes up current debates in comparative and historical sociology that deal with multiple modernities and civilizations It does so through an examination of patterns of state formation civilization and the development of capitalism in the interaction of European and American worlds over three centuries The early part of the argument explores cutting edge theoretical debates around the

nature of early modern formations The Western Heritage: Since 1789 Donald Kagan,2007 **Colonizer or Colonized** Sara E. Melzer,2011-11-29 Colonizer or Colonized introduces two colonial stories into the heart of France s literary and cultural history The first describes elite France s conflicted relationship to the Ancient World As much as French intellectuals aligned themselves with the Greco Romans as an us they also resented the Ancients as an imperial them haunted by the memory that both the Greeks and Romans had colonized their ancestors the Gauls This memory put the elite on the defensive defending against the legacy of this colonized past and the fear that they were the barbarian other The second story mirrored the first Just as the Romans had colonized the Gauls France would colonize the New World becoming the New Rome by creating a New France Borrowing the Roman strategy the French Church and State developed an assimilationist stance towards the Amerindian barbarian This policy provided a foundation for what would become the nation s most basic stance towards the other However this version of assimilation unlike its subsequent ones encouraged the colonized and the colonizer to engage in close forms of contact such as mixed marriages and communities This book weaves these two different stories together in a triangulated dynamic It asks the Ancients to step aside to include the New World other into a larger narrative in which elite France carved out their nation s emerging cultural identity in relation to both the New World and the Ancient World *Eurasia at the Dawn of History* Manuel Fernández-Götz,Dirk Krausse,2017-01-16 Our current world is characterized by life in cities the existence of social inequalities and increasing individualization When and how did these phenomena arise What was the social and economic background for the development of hierarchies and the first cities The authors of this volume analyze the processes of centralization cultural interaction and social differentiation that led to the development of the first urban centres and early state formations of ancient Eurasia from the Atlantic coasts to China The chronological framework spans a period from the Neolithic to the Late Iron Age with a special focus on the early first millennium BC By adopting an interdisciplinary approach structured around the concepts of identity and materiality this book addresses the appearance of a range of key phenomena that continue to shape our world Global Dishes Caryn E. Neumann,Lori L. Parks,Joel G. Parks,2023-06-30 Winner 2024 RUSA Outstanding Reference Award Through an interdisciplinary approach that shows how food can reflect a culture and time this book whets the appetite of students for further research into history anthropology geography sociology and literature Food is a great unifier It is used to mark milestones or rites of passage It is integral to the way we celebrate connecting a familial and cultural past to the present through tradition It bolsters the ill and soothes those in mourning The dishes in this text are those that have come to be known within a part of the world and culture but also have moved beyond those borders and are accessible and enjoyed by many in our ever smaller and more interconnected world Featuring more than 100 recipes and detailed discussions of dishes from across the globe *Global Dishes Favorite Meals from around the World* explores the history and cultural context surrounding some of the best known and favorite foods The book covers national dishes from more than 100 countries

including large nations like Mexico and small countries like Macao There is also coverage of foods beloved by Indigenous peoples such as the Sami of Scandinavia Traditional favorites are offered as well as newer dishes

Globalization and Global History Barry K. Gills, William Thompson, 2012-11-12 Globalization and Global History argues that globalization is not an exotic and new phenomenon Instead it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact Studying globalization from the vantage point of long term global history permits theoretical and empirical investigation allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations With this historical advantage the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past The book is divided into three sections The first focuses on how globalization has been written about from a historical perspective The second part advances three different takes on how best to view globalization from a very long term stance The final section continues this interpretative thread by examining more narrow aspects of globalization processes ranging from incorporation processes to systemic disruptions

Communication in Modern Social Ordering Kai Eriksson, 2011-07-21 Communication in Modern Social Ordering investigates the modern history of communication in relation to the thinking of the political community in the United States By illustrating the intertwining of the technological developments in communication methods and its community building effects the different representations of society and their political implications are examined against the development of communication systems from the telegraph to the telephone to computer networks It was the telegraph that made communication a continual process thus freeing it from the rhythmical motion of the postal service and from physical transportation in general and provided both a model and a mechanism of control Using the theories of both Foucault and Heidegger to provide a lens for new investigation the author studies not the meanings of communication and its logic as such but rather the conditions and structures that allow meanings and logic to be formulated in the first place The book offers an original combination of historical analysis with an ontological discussion of the evolution of telecommunications in the U S as a phenomenon of modern social ordering

The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and dis ability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged

individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production

The Negro Educational Review ,1962 **The Anthropology of Latin America and the Caribbean**

Harry Sanabria,2015-09-16 The first single authored comprehensive introduction to major contemporary research trends issues and debates on the anthropology of Latin America and the Caribbean The text provides wide and historically informed coverage of key facets of Latin American and Caribbean societies and their cultural and historical development as well as the roles of power and inequality Cymeme Howe Visiting Assistant Professor of Cornell University writes The text moves well and builds over time paying close attention to balancing both the Caribbean and Latin America as geographic regions Spanish and non Spanish speaking countries and historical and contemporary issues in the field I found the geographic breadth to be especially impressive Jeffrey W Mantz of California State University Stanislaus notes that the contents reflect the insights of an anthropologist who knows Latin America intimately and extensively
