

World Hunger And Poverty

The population of Brazil is growing rapidly. If its present rate of growth of 2.8 percent continues, it will soon become the most populous country in the Western Hemisphere. Although Brazil is rich in natural resources and has significant economic growth, most of the benefits have gone to the rich. Forty percent of the population is under fifteen years of age, and unemployment is high. Population growth in the cities has made it difficult for the government to provide education, health care, water, sanitation, food, and housing for the poor. What steps if any, should be taken to provide for the poor and needy people in this country? The current economic crisis shaking the global economy has prompted many nations to review their economic policies to cope with the challenges of minimizing the impact of recession brought about by instability of securing markets, associated demand and questionable production supply and raw materials. As it stands, the world's leading nations are in trouble of entering an even greater crisis brought about by. It must be understood that the resources that are provided are finite in relation to the needs and wants of human beings. This mismatch is a problem that must be dealt with immediately and effectively because if this is allowed to continue there will not be enough for everyone and the basic needs for survival cannot even be provided adequately. As the Brazilian model has shown, the country does not even have the basic provisions that are necessary for survival. The population is suffering and the government is unable to make any lasting progress because of the problems that it is facing. Key to finding a lasting solution is in understanding the root cause of the problem. A quick look at the world population reveals that while global economies are reeling from one economic uncertainty to the next, the need for goods and services of their respective populace are increasing as rapidly as their population increases and matures. Putting this in the context of Maslow's Hierarchy of Needs an upward pressure is placed upon the demand for the basic necessities such as food and natural resources and the aspiration for self-actualization becomes more and more undeniable. This brings to mind the fact that as long as there is poverty, peace is hardly attainable; and if governments do not secure the basic needs, peace and stability may never become a reality (Issit 2). From this, it is clear that there is an urgent need for the governments all over the world to curb if not control the growth of their respective populations. The first reason is because of the enormous strain that this is putting on the world's resources could trigger over inflation (Issit 2). This can be best explained by a simple supply and demand model. When there is a shortage of supply and the demand for the good remains constant. This simply means that there is less of the good that is available and the same number of people wants the good. This can be likened to a bidding war where there is only one item and people offer the seller as much as they can to be able to attain it thus raising the price and eliminating all those who do not have enough resources to compete. Conversely, when there is an oversupply and the demand remains constant, the equilibrium price falls. Analogous to this would be the growth of the population and the increase of demand with the supply remaining the same or even decreasing. As such, if the governments are unwilling or unable to deal with the problem there could be widespread hunger and not amount of welfare or government intervention would then be able to alleviate the situation for it would already be too late (Issit 2). This concern comes on the heels of the recent UNESCO report showing that while the world is recovering from crisis it still has not addressed the fact that more and more individuals are suffering from hunger and unemployment. The recent studies on population growth reveal that in the next couple of years the increase of human beings per country will exert so much pressure on the demand for natural resources and on the environment that it will cost more to feed each person than it ever has. With there being to emphasis on plans for rehabilitation or a move to more sustainable methods, it remains to be seen whether or not the world will be able to recover from the damage that is projected to be caused. The second reason is because of the fact that the population of the world is growing at a very rapid pace, most especially in the developing countries. As can be seen in the graph below, the exponential increase in population without the corresponding increase in food supply will lead to an imbalance. These are the problems affecting Brazil and in order to solve these, there is a need to implement programs that provide sustainable development. Brazil is currently one of the leaders in methane capture technology and biodiesel. Using this as a springboard, access to cheaper alternative fuels could allow the country to make significant progress in manufacturing. Having cheaper and cleaner energy can provide a two-fold revenue stream that can eventually be used to finance much needed infrastructure projects in the area. The carbon credits from the sale can be used to build schools and health centers while the methane energy can be used to build schools.

Independent Scholars Meet the World Christine Caccipuoti, Elizabeth Keohane-Burbridge, 2020-10-16 For too long graduate school was viewed solely as a pipeline to teaching positions at colleges and universities As MAs and PhDs proliferate and opportunities in the academy narrow this timely book

reminds us that the academy is only one of many venues for satisfying and successful scholarly endeavor. The contributors to *Independent Scholars Meet the World* represent a spectrum of graduate school experiences from leaving midprogram to completing an MA or PhD. They include those who sought nontraditional paths and others who started in the familiar professorial direction only to change course. Ultimately they are independent scholars contributing to their fields but working outside the academy. Their stories illustrate the variety of options that exist beyond the university setting from museum education and high school teaching to newer professions like podcasting and creating historical coloring books. These scholars impart advice about encountering difficulties, overcoming challenges, and learning to adapt to changing circumstances. All have something to share that the graduating scholar and those who guide them ought to hear about: cultivating networks, viewing departure from familiar terrain as an option, not a failure, and understanding the real value that an independent scholar brings to any number of situations. Perhaps the most important lesson this book offers is for those steeped in the belief that the only right way to be a scholar is as a tenured professor and how therefore to embrace the label independent scholar. The contributors to *Independent Scholars Meet the World* offer the advice and encouragement they wish they'd received when heading into uncharted postgraduate territory. They demonstrate that success awaits the determined and resourceful scholar pursuing a different path towards expanded academic horizons.

Relentless Pursuit Donna Foote, 2009-03-10. When Locke High School opened its doors in 1967, the residents of Watts celebrated it as a sign of the changes promised by Los Angeles. But four decades later, first-year Teach for America recruits Rachelle Phillip Hrag and Taylor are greeted by a school that looks more like a prison, with bars, padlocks, and chains all over. With little training and experience, these four will be asked to produce academic gains in students who are among the most disadvantaged in the country. *Relentless Pursuit* lays bare the experiences of these four teachers to evaluate the strengths and peculiarities of Teach for America and a social reality that has become inescapable.

How Stella Learned to Talk Christina Hunger, 2021-05-04. INSTANT NEW YORK TIMES BESTSELLER. An incredible revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech language pathologist Christina Hunger, who has taught her dog Stella to communicate using simple paw-sized buttons associated with different words. When speech language pathologist Christina Hunger first came home with her puppy Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked. Whenever she took Stella out of the house, a few years later, Stella now has a bank of more than thirty word buttons and uses them daily, either individually or together to create near-complete sentences. *How Stella Learned to Talk* is part memoir and part how-to.
