

Wound Care Billing Guidelines 2019

Not only is wound [coding](#) and documentation is a daunting task, but also attracts intense inspection from auditors, with severe financial penalties for mistakes. And it's only gotten more challenging with the new [ICD-10](#) changes.

What is included in the wound care billing guidelines 2019?

An infected surgical wound, T81.4xxA, is among those S1 codes that are set to be deleted.

Now the coders will have only 15 additional codes added to an expanded T81.4- subcategory. This will give accurate reporting of the depth of the infection.

For instance, the coders will have the knack to specify whether the surgical wound infection is affecting the superficial incision surgical site i.e. T81.41-, the deep incisional surgical site i.e. T81.42-, or the organ and space surgical site i.e. T81.43-.

In wound care [billing](#) guidelines 2019; other surgical site and unspecified options are also available i.e. T81.49- as well as T81.40-.

The new wound care billing guidelines codes T81.41-, T81.42- and T81.43- will receive additional inclusion terms to help guide coders to the appropriate code choice. Subcutaneous abscess following a procedure and Stitch abscess following a procedure will be sited at T81.41-.
