*Practical Essentials of Intensity Modulated Radiation Therapy* K.S. Clifford Chao, 2013-10-18. The third edition of Intensity Modulated Radiation Therapy was written to enhance the reader's understanding of the cutting edge technology of Intensity Modulated Radiation Therapy. It is designed to both update old readers and inform new readers about the complexities and details of clinical management. This completely updated edition provides a step by step practical approach to the use of IMRT in the evaluation and treatment of cancer patients. Because of IMRT's ability to employ individually controlled beamlets it is an extremely promising technique especially when paired with CT PET and or MRI. With these improved procedures doctors and clinicians will be able to take high resolution images of tumors while minimizing dosages to surrounding tissue. In order to focus on the most up to date IMRT techniques the introductory chapters have been condensed to provide a brief overview of IMRT physics, mechanics and quality assurance and also CT and MR imaging. To help assist in clinical decision making it provides the reader with more than 700 full color illustrations, IMRT tables and clear straightforward descriptions that address a range of tumor types and sites including head and neck, urinary and gynecologic cancers. **IS**, 1962

**Optimization of Structural Topology, Shape, and Material** Martin P. Bendsoe, 2013-03-14. In the past the possibilities of structural optimization were restricted to an optimal choice of profiles and shape. Further improvement can be obtained by selecting appropriate advanced materials and by optimizing the topology, i.e. finding the best position and arrangement of structural elements within a construction. The optimization of structural topology permits the use of optimization algorithms at a very early stage of the design process. The method presented in this book has been developed by Martin Bendsoe in cooperation with other researchers and can be considered as one of the most effective approaches to the
