An Analysis of the West African School Certificate Examination in Nigeria Azukaego Enwesi, 1974 **Daily Graphic**
Elvis Aryeh, 2002-05-25 *West Africa*, 2002 *Daily Graphic* Elvis D. Aryeh, 1997-06-04 **Handbook of Research on
the Role of Human Factors in IT Project Management** Misra, Sanjay, Adewumi, Adewole, 2019-09-27 The role humans
play in the field of information technology continues to hold relevance even with the industry's rapid growth. People
contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this
phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient
data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative
research on the methods and applications of the task of human characteristics in the design and development of new
technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed
for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and
students seeking current research on the dynamics of human influence in technological projects. **Junior Graphic** Mavis

Instructional Strategies on Achievement and Retention of Secondary School Students in Computer Studies Dr. Anusiuba
Overcomer, Ifeanyi Alex, Dr. Ashoka S. B., Paul, Roseline Uzoamaka, 2022-12-21 The study was led by six research questions
and six hypotheses were examined at a significance level of 0.05. The quasi-experimental design was used, notably the non-
equivalent control group design for the pretest and posttest. 4,873 senior secondary school students in the Nnewi Education
Zone of the state of Anambra make up the study's population. In the study, 2.73 percent of the population was used. A sample
of 133 Nnewi Education Zone SS2 computer science students was used. The Computer Studies Department and one
knowledgeable computer studies teacher from Nnewi Kudder Richardson Formula 20 was used to determine the instrument's
reliability. The CSAT was used as a pretest and posttest to gather data. Three weeks following the post-test, the retention test
was given. The results demonstrated that a lesson followed by animated media education greatly improved students' computer
science performance. When compared to the traditional approach, only tutorials considerably increased students' retention,
however, this improvement was not significant when compared to animated media. The study concluded that tutorials are
successful at raising students' achievement and retention. The use of animated material in the classroom has been shown to
improve student achievement. **Comments of the Federal Military Government on the Report of the Tribunal of
