WHAT TO WEAR

> 77 F
> 25 C

In warm waters you won't need a wetsuit. Unless you also wear a wetsuit in a sauna or to the beach - joke intended. However, we do recommend to protect yourself against the sun. This can be done by wearing one of our thinner Lycras.

When the weather is a bit colder outside, windy, or the water is colder than usual, e.g. in mornings or evenings, we recommend to use one of our tops, or even a Shorty wetsuit, to enjoy more time on the water without starting to feel cold.

If the water temperature drops to 20-22 degree Celsius, it also becomes less enjoyable to surf with just e.g. a top, or a shorty. If you generally do not like coldish water, or if the winds in these waters are stronger, we think you might feel more comfortable in a shorty with long arms or even in a thinner fullsuit.

This is rather cold water, but it should not limit you from enjoying a good session when the wind is blowing. We recommend to use a 5/4 wetsuit, however, if you do not usually feel very cold very quickly, or if you don't intend to spend too much time on the water, a 3/2 full suit could also suffice.

These proceedings are interdisciplinary studies on the concepts and methods of physiology, psychology, system engineering, computer science, environment science, management, education, and other related disciplines. Researchers and professionals who study an interdisciplinary subject crossing above disciplines or researchers on MMESE subject will be mainly benefited from this proceedings. MMESE primarily focuses on the relationship between Man, Machine, and Environment, studying the optimum combination of man-machine-environment systems. In this system, Man refers to working people as the subject in the workplace, e.g., operators, decision makers. Machine is the general name for any object controlled by Man, including tools, machinery, computers, systems, and technologies, and Environment describes the specific working conditions under which Man and Machine interact, e.g., temperature, noise, vibration, hazardous gases, etc. The three goals of optimization of the man-machine-environment systems are to ensure safety, efficiency, and economy. The integrated and advanced science research topic Man Machine Environment System Engineering MMESE was first established in China by Professor Shengzhao Long in 1981 with direct support from one of the greatest modern Chinese scientists Xuesen Qian. In a letter to Shengzhao Long from October 22nd 1993, Xuesen Qian wrote, "You have created a very important modern science and technology in China."
