**Engineering Education** ,1989  
Software Solutions for Engineers and Scientists Julio Sanchez,Maria P. Canton,2018-03-22 Software requirements for engineering and scientific applications are almost always computational and possess an advanced mathematical component However an application that calls for calculating a statistical function or performs basic differentiation of integration cannot

be easily developed in C or most programming languages In such a case the engineer or scientist must assume the role of software developer And even though scientists who take on the role as programmer can sometimes be the originators of major software products they often waste valuable time developing algorithms that lead to untested and unreliable routines Software Solutions for Engineers and Scientists addresses the ever present demand for professionals to develop their own software by supplying them with a toolkit and problem solving resource for developing computational applications The authors provide shortcuts to avoid complications bearing in mind the technical and mathematical ability of their audience The first section introduces the basic concepts of number systems storage of numerical data and machine arithmetic Chapters on the Intel math unit architecture data conversions and the details of math unit programming establish a framework for developing routines in engineering and scientific code The second part entitled Application Development covers the implementation of a C program and flowcharting A tutorial on Windows programming supplies skills that allow readers to create professional quality programs The section on project engineering examines the software engineering field describing its common qualities principles and paradigms This is followed by a discussion on the description and specification of software projects including object oriented approaches to software development With the introduction of this volume professionals can now design effective applications that meet their own field specific requirements using modern tools and technology
