Reflective Clinical Supervision in Speech and Language Therapy - Ruth Howes, 2022-10-31. This book demystifies supervision in speech and language therapy, focusing on the practicalities and pitfalls. Clinicians are encouraged to reflect on their individual style as a supervisor and the tools they utilise to make a successful supervisory relationship. Drawing on previous experience, Howes offers a combination of reflective, solution-focused, and strengths-based approaches covering topics such as: The importance of the supervisory conversation; Ways to ensure conversations are reflective and appreciative; Supportive yet challenging; The training needed to be effective supervisors and good supervisees; The functions of supervision and how these change over time for each clinician; From learning new clinical skills to support in time and energy management; Practical resources for busy clinicians, making it a manual of insights and support for supervision in SLT. Reflective Clinical Supervision in Speech and Language Therapy will be an invaluable guide for all speech and language therapists who are either experienced or newly established supervisors supporting others with the complexities of casework and the stress of relationships in every busy working day.

Bacterial Artificial Chromosomes - Shaying Zhao, Marvin Stodolsky, 2008-02-03. Several developmental and historical threads are woven and displayed in these two volumes of Bacterial Artificial Chromosomes: the first on Library Construction, Physical Mapping, and Sequencing, and the second on Functional Studies. The use of large insert clone libraries is the unifying feature, with many diverse contributions. The editors have had quite distinct roles: Shaying Zhao has managed several BAC end sequencing projects; Marvin Stodolsky, during 1970-1980, contributed to the elucidation of the natural bacteriophage prophage P1 vector system. Later, he became a member of the Genome Task Group of the Department of Energy (DOE) through which support flowed for most clone library resources of the Human Genome Program (HGP). Some important historical contributions are not represented in this volume. This preface, in part, serves to mention these contributions and also briefly surveys historical developments. Leon Rosner

deceased contributed substantially in developing a PAC library for drosophila that utilized a P1 virion based encapsidation and transfection process This library served prominently in the Drosophila Genome Project collaboration PACs proved easy to purify so that they substantially replaced the YACs used earlier Much of the early automation for massive clone picking and processing was developed at the collaborating Lawrence Berkeley National Laboratory However the P1 virion encapsidation system itself was too fastidious and P1 virion based methods did not gain popularity in other genome projects **Basic**
