**of Justice Without Illusions** Louis E. Wolcher, 2016-06-17 The founding premise of this book is that the nimbus of prestige which once surrounded the idea of justice has now been dimmed to such a degree that it is no longer sufficient to secure the possibility of a good conscience for those who undertake in good faith to make the world a better place in the spheres of politics and law The many decent human beings who have noticed and experienced this diminishment of justice's prestige find themselves in a thoroughly disenchanted existential situation For them the attempt to do justice without the illusion of being grounded in something beyond the sheer facticity of their own performances is a distinctly ethical theme which cries out to be investigated in its own right Heeding the cry this book asks and attempts to answer the following fundamental ethical question is a life in the law even one spent in the pursuit of justice worth living and if so how can a disenchanted person come to bear the living of it without constantly having to engage in self deception If Nietzsche is right that living without illusions is impossible for human beings then the most important ethical implication of this essentially anthropological fact goes far beyond the question of what illusions we ought to choose It must also include the question of whether we should succumb to that most seductive and pernicious of all illusions namely the belief that exercising great care and responsibility in choosing our illusions which we might then call our principles of justice excuses us ethically for what we do to others in their name The culmination of a 10 year legal philosophical project this book will appeal to graduate students

scholars and curious non academic intellectuals interested in continental philosophy critical legal theory postmodern theology the philosophy of human rights and the study of individual ethics in the context of law *FINANCIAL POLICY AND MANAGEMENT ACCOUNTING, Ninth Edition* BANERJEE, BHABATOSH, 2017-05-01 This well received book now in its ninth edition provides a comprehensive analysis of the fundamental concepts of financial management and management accounting The elegantly combined presentation of the various aspects of financial management and management accounting is a highlight of this text Focusing on the core areas of financial management basic concepts of finance sources of finance capital structure theories and planning dividend policies investment decisions portfolio management and working capital management as well as the areas of management accounting changes in financial position financial statement analysis and inter firm comparison budgetary control and standard costing and cost information and management decisions the book also delves on the contemporary topics such as financial environment corporate governance and international financial management in detail In addition it contains a number of case studies on various areas of finance and management accounting The current edition has been thoroughly revised keeping in view contemporary developments in the literature and applicable provisions of the Companies Act 2013 Apart from updating the case studies new cases have been added to support the relevance and quality of discussion Intended primarily for postgraduate students of commerce M Com and management MBA with finance specialization the book will also be highly useful for undergraduate students of Commerce and Management students of professional courses such as CA and ICWA as well as professionals in the fields of financial management and management accounting The present treatise has been recommended by many Colleges Management Institutes and Universities in India for their respective postgraduate and undergraduate commerce and management courses
