

Radio Repair Harness Saves Time and Money

When a radio is stolen, the thief often cuts the connector off the dashboard wire harness so the radio can be easily connected to another vehicle. This means added repair cost for the vehicle owner, since the dashboard wire harness must also be replaced as well as the radio itself.

To reduce repair costs, a short repair harness is available that eliminates the need to replace the dashboard wire harness (see chart below). It connects easily to the existing dashboard wire harness with solderless splice connectors available in terminal kit B (P/N 07QAZ-003020B, H/C 4733218). For the correct connector and wire color information, refer to the appropriate service manual or ETM. Each vehicle model can have different wire colors that may or may not match the repair harness.
