## Project Management Methodologies

### Lakes Automotive

1. How do companies combine methodologies?

Just as mergers or acquisitions work, there will be a landlord and a tenant. The landlord generally controls the decision-making process, and we hope that the landlord has a good understanding of project management. Usually the tenant will agree with the landlord's decisions about a methodology, but this is not always the case. There should be agreement between everyone who eventually will be users of the methodology.

2. How do you get employees to change work habits that have proven to be successful?

Employees must see what is in it for them if they change work habits. If they are unwilling to make changes, then senior management may find it necessary to force the issue and dictate the necessary changes.

3. What influence should a customer have in redesigning a methodology that has proven to be successful?

This is a tough question to answer. Generally, the customer has no input. However, there are two exceptions where you may ask the customer for input: (a) you expect a lot of follow-on work from this customer, and (b) the project takes place at the customer's location and your methodology must fit the customer's business model.

4. What if the customers want the existing methodologies left intact?

Now you must ask yourself how import repeat business is from this customer.

5. What if the customers are unhappy with the new combined methodology?

The answer here is similar to the answer to question 4. If customers are unhappy with your methodology, you may have to create a flexible methodology or framework that you then can customize for each different client's needs.

### Ferris Healthcare, Inc.

1. Why was it so difficult to develop a single methodology from the start?

It is almost impossible to develop a singular methodology that includes the features and needs of every type of project in the organization.

2. Why were all three initial methodologies based on policies and procedures?
