Erickson, John L. Hedrick, 1999-04-29 The complete control system engineering solution for continuous and batch manufacturing plants This book presents a complete methodology of control system design for continuous and batch manufacturing in such diverse areas as pulp and paper petrochemical chemical food pharmaceutical and biochemical production Geared to practicing engineers faced with designing increasingly more sophisticated control systems in response to present day economic and regulatory pressures Plantwide Process Control focuses on the engineering portion of a plant automation improvement project It features a full control design information package Control Requirements Definition or CRD and guides readers through all steps of the automation process from the initial concept to design simulation testing implementation and operation This unique and practical resource Integrates continuous batch and discrete control techniques Shows how to use the methodology with any automation project existing or new simple or complex large or small Relates recent ISO and ISA standards to the discipline of control engineering Illustrates the methodology with a pulp and paper mill case study Incorporates numerous other examples from single loop controllers to multivariable controllers

Let's GO PIC!!! The book Marco Gottardo, 2012-09-05 This book is the culmination of Marco Gottardo's teaching and work in electronics and automation It is the first book in a self teaching series that affords a solid foundation in PIC microcontroller programming The book contains a range of fully explained problems and exercises as well as three comprehensive essays which are milestones for any industrial automation course Key chapters are devoted to interrupt systems analog signals and LCD displays The book looks at HITECH C language on IDE MPLAB software and on Micro GT Mini and IDE hardware platforms which can be easily ordered online It also explains LadderPIC a language that enables microcontrollers to be programmed in the same way as PLCs A follow up Let's Make Robots will be published in December 2012
