The Problems of Contemporary Philosophy Paul

Livingston, Andrew Cutrofello, 2015-12-08 This accessible new book provides a clear and wide-ranging introduction to the defining problems of contemporary philosophy. Its unique feature is to focus on problems that cut across the established divide between analytic and continental philosophical traditions. Instead of segregating the two traditions as is usually done the authors offer a critical orientation and guide for readers who are not exclusively affiliated with either approach and who want to understand the increasingly shared questions philosophers are asking and addressing today. Each chapter starts with a fundamental overarching question: 1 What and how can we know? 2 What is the structure of the world? 3 What goes beyond the physical world? 4 What is to be done? 5 What does it mean to orient oneself philosophically? Under these headings the authors critically examine the disciplines' most fundamental problems. Their approach reveals deep and unexpected connections across the analytic/continental divide and opens up new ways of thinking about critique itself. No other book

about contemporary philosophy is as comprehensive and cosmopolitan The Problems of Contemporary Philosophy provides newcomers and seasoned philosophers alike with an entertaining engaging and far reaching portrait of todays philosophical landscape It is an exemplary instance of thinking across and beyond the analytic continental divide The Oxford Handbook of Psychotherapy Ethics Manuel Trachsel,Nikola Biller-Andorno,Jens Gaab,Şerife Tekin,John Z. The Inconspicuous God Jason W. Alvis,2018-06-01 Dominique Janicaud once famously critiqued the work of French phenomenologists of the theological turn because their work was built on the seemingly corrupt basis of Heidegger's

notion of the inapparent or inconspicuous In this powerful reconsideration and extension of Heidegger's phenomenology of the inconspicuous Jason W Alvis deftly suggests that inconspicuousness characterizes something fully present and active yet quickly overlooked Alvis develops the idea of inconspicuousness through creative appraisals of key concepts of the thinkers of the French theological turn and then employs it to describe the paradoxes of religious experience **A Critical**

Introduction to the Epistemology of Perception Ali Hasan, 2017-02-23 We ordinarily take it as obvious that we acquire knowledge of our world on the basis of sensory perception and that such knowledge plays a central cognitive and practical role in our lives Upon reflection however it is far from obvious what perception involves and how exactly it contributes to our knowledge Indeed skeptical arguments have led some to question whether we have any knowledge or even rational or justified belief regarding the world outside our minds Investigating the nature and scope of our perceptual knowledge and perceptually justified belief A Critical Introduction to the Epistemology of Perception provides an accessible and engaging introduction to a flourishing area of philosophy Before introducing and evaluating the main theories in the epistemology of perception Ali Hasan sets the stage with a discussion of skepticism realism and idealism in early modern philosophy theories of perceptual experience sense datum theory adverbialism intentionalism and metaphysical disjunctivism and central controversies in general epistemology Hasan then surveys the main theories in the contemporary debate including coherentism abductivism phenomenal conservatism or dogmatism reliabilism and epistemological disjunctivism presenting the motivations and primary objections to each Hasan also shows how to avoid confusing metaphysical issues with epistemological ones and identifies interesting connections between the epistemology and metaphysics of perception For students in epistemology or the philosophy of perception looking to better understand the central questions concepts and debates shaping contemporary epistemology A Critical Introduction to the Epistemology of Perception is essential reading

Epistemontology in Spinoza-Marx-Freud-Lacan A. Kiarina Kordela, 2017-10-06 A Kiarina Kordela steps beyond extant commentaries on Marx's theory of commodity fetishism from A Sohn Rethel to L Althusser Balibar Slavoj Žižek and others to show that in capitalism value is the manifestation of the homology between thought and being while their other aspect power is foreclosed and becomes the object of biopower Using monistic Marxian Lacanian structuralism as an alternative to dominant models from Plato and Kant to phenomenological accounts deconstruction and other contemporary approaches Kordela expertly argues that Marx's theory of commodity fetishism is a reformulation of the Spinozian thesis that thought mind and things bodies or extension are manifestations of one and the same being or substance Kordela's link between Spinoza and Marx shows that being consists of two aspects value and power the former leading to structuralist thought the latter becoming the object of contemporary biopower Epistemontology in Spinoza Marx Freud Lacan intervenes between two dominant lines of thought in the reception of Marx today on the one hand an approach that relates Marxian thought to psychoanalysis from a Hegelian dialectical perspective and on the other hand an approach that links Marxism to Spinozian

monism at the total exclusion of psychoanalysis This book will interest scholars and researchers who study Marxism post structuralism psychoanalysis critical theory ontology epistemology and theories of representation theoreticians of cultural studies and comparative literature aesthetic theory including the relation of art to economy and politics and biopolitics

Linking Game-Theoretical Approaches with Constructive Type Theory

Nicolas Clerbout,Shahid Rahman,2015-07-08 This title links two of the most dominant research streams in philosophy of logic namely game theory and proof theory As the work s subtitle expresses the authors will build this link by means of the dialogical approach to logic One important aspect of the present study is that the authors restrict themselves to the logically valid fragment of Constructive Type Theory CTT The reason is that once that fragment is achieved the result can be extended to cover the whole CTT system The first chapters in the brief offer overviews on the two frameworks discussed in the book with an emphasis on the dialogical framework The third chapter demonstrates the left to right direction of the equivalence result This is followed by a chapter that demonstrates the use of the algorithm in showing how to transform a specific winning strategy into a CCT demonstration of the axiom of choice The fifth chapter develops the algorithm from CTT demonstrations to dialogical strategies This brief concludes by introducing elements of discussion which are to be developed in subsequent work

The Affect of Difference Christopher P. Hanscom, Dennis Washburn, 2016-05-31 The Affect of Difference is a collection of essays offering a new perspective on the history of race and racial ideologies in modern East Asia Contributors approach this subject through the exploration of everyday culture from a range of academic disciplines each working to show how race was made visible and present as a potential means of identification By analyzing artifacts from diverse media including travelogues records of speech photographs radio broadcasts surgical techniques tattoos anthropometric postcards fiction the popular press film and soundtracks an archive that chronicles the quotidian experiences of the colonized their essays shed light on the politics of inclusion and exclusion

that underpinned Japanese empire One way this volume sets itself apart is in its use of affect as a key analytical category Colonial politics depended heavily on the sentiments and moods aroused by media representations of race and authorities promoted strategies that included the colonized as imperial subjects while simultaneously excluding them on the basis of natural differences Chapters demonstrate how this dynamic operated by showing the close attention of empire to intimate matters including language dress sexuality family and hygiene The focus on affect elucidates the representational logic of both imperialist and racist discourses by providing a way to talk about inequalities that are not clear cut to show gradations of power or shifts in definitions of normality that are otherwise difficult to discern and to present a finely grained perspective on everyday life under racist empire It also alerts us to the subtle often unseen ways in which imperial or racist affects may operate beyond the reach of our methodologies Taken together the essays in this volume bring the case of Japanese empire into comparative proximity with other imperial situations and contribute to a deeper more sophisticated understanding of the role that race has played in East Asian empire
