Get Your Spirit Back Earl McClellan, 2024-11-12 In this bold call to find your purpose a sought after speaker and devoted pastor inspires you to show up to your life with God given confidence by moving beyond insecurity and negative self talk In a world focused on the exterior Earl McClellan reveals that real transformation always begins within Rich Wilkerson lead pastor of VOUS Church What if the main thing holding you back in life is you Pastor Earl McClellan knew he d been given a gift for leadership yet too often whenever the time came to speak up he would shy away He passed the spotlight to others until God challenged him to stop sidestepping his calling Now a speaker and church founder McClellan shares how he learned to break free from the prisons of insecurity negativity and confusion In this manifesto of courage and purpose McClellan draws fresh insights from the life of the unlikely biblical hero Gideon to help you do the same Discover how to identify when God is speaking and when you re overthinking replace insecurity with God given confidence follow God s call with bold humility engage God s presence power and favor wherever you go If you ve ever felt you had more to give leadership courage kindness but have struggled to fully unleash these qualities Get Your Spirit Back is the catalyst you need Liberate yourself from the mindset holding you back and stand in the confidence of who God made you to be

The Unpredictable Species Philip Lieberman, 2013-04-21 How our brains have evolved so that we control how we think and behave The Unpredictable Species argues that the human brain evolved in a way that enhances our cognitive flexibility and capacity for innovation and imitation In doing so the book challenges the central claim of evolutionary psychology that we are locked into predictable patterns of behavior that were fixed by genes and refutes the claim that language is innate Philip Lieberman builds his case with evidence from neuroscience genetics and physical anthropology showing how our basal ganglia structures deep within the brain whose origins predate the dinosaurs came to play a key role in human creativity He demonstrates how the transfer of information in these structures was enhanced by genetic mutation and evolution giving rise to supercharged neural circuits linking activity in different parts of the brain Human invention expressed in different epochs and locales in the form of stone tools digital computers new art forms complex civilizations even the latest fashions stems from these supercharged circuits The Unpredictable Species boldly upends scientifically controversial yet popular beliefs about how our brains actually work Along the way this compelling book provides insights into a host of topics related to human cognition including associative learning epigenetics the skills required to be a samurai and the causes of cognitive confusion on Mount Everest and of Parkinson s disease
