Strength and Behavior of Reinforced Concrete Slab-column Connections Subjected to Static and Dynamic Loadings Marvin E. Criswell, 1970 The objectives of this investigation were to study the strength and behavior of slowly statically loaded reinforced concrete slab column connections and to determine the effect of rapid dynamic loading on the strength and behavior by comparison with the static test results Nineteen full scale models of a connection and adjoining slab area consisting of a simply supported slab 84 or 94 inches square and 6 1 2 inches thick loaded concentrically on a 10 or 20 inch square stub column at the center of the slab were tested The main variables were the amounts of reinforcement in the slab p 0 75 and 1 50 percent the column size and the loading speed Eight specimens were loaded to failure statically two were subjected to a very rapidly applied load of short duration and nine were loaded to failure by a rapidly applied load with a rise time chosen to represent the conditions in a blast loaded structure The static test results are compared with 12 shear strength prediction methods Differences between the mechanism of shear failure in slabs and beams are examined Author

Engineering Mechanics: Statics James L. Meriam, 1995 **Statics and Rotational Dynamics of Composite Beams** Mehrdad Ghorashi, 2016-02-06 This book presents a comprehensive study of the nonlinear statics and dynamics of composite beams and consists of solutions with and without active elements embedded in the beams The static solution provides the initial conditions for the dynamic analysis The dynamic problems considered include the analyses of clamped hingeless and articulated hinged accelerating rotating beams Two independent numerical solutions for the steady state and the transient responses are presented The author illustrates that the transient solution of the nonlinear formulation of accelerating rotating beam converges to the steady state solution obtained by the shooting method Other key areas considered include calculation of the effect of perturbing the steady state solution coupled nonlinear flap lag dynamics of a rotating articulated beam with hinge offset and aerodynamic damping and static and dynamic responses of nonlinear

composite beams with embedded anisotropic piezo composite actuators The book is intended as a thorough study of nonlinear elasticity of slender beams and is targeted to researchers graduate students and practicing engineers in the fields of structural dynamics aerospace structures and mechanical engineering **Statics** James L.
