Music As Episteme, Text, Sign, and Tool Zachar Laskewicz, 2003 The primary intention of this work is to present a set of alternative approaches to musicality where the object of analysis is the process of music making rather than the product or end result It uses as its source the concept of musicality as a way of comprehending reality rather than as a static reflection of it and Balinese music is the main cultural example

Dunning,2019-10-10 Over several decades scholarship in New Testament and early Christianity has drawn attention both to the ways in which ancient Mediterranean conceptions of embodiment sexual difference and desire were fundamentally different from modern ones and also to important lines of genealogical connection between the past and the present The result is that the study of gender and sexuality in early Christianity has become an increasingly complex undertaking This is a complexity produced not only by the intricacies of conflicting historical data but also by historicizing approaches that query the very terms of analysis whereby we inquire into these questions in the first place Yet at the same time recent work on these topics has produced a rich and nuanced body of scholarly literature that has contributed substantially to our understanding of early Christian history and also proved relevant to ongoing theological and social debates The Oxford Handbook of Gender and Sexuality in the New Testament provides a roadmap to this lively scholarly landscape introducing both students and other scholars to the relevant problems debates and issues Leading scholars in the field offer original contributions by way of synthesis critical interrogation and proposals for future questions hypotheses and research trajectories *Maple® for Environmental Sciences* Bill Scott,2012-12-06 What is this book about Please take this book as it is a working document It started as an idea that has grown It will never be correct but should be self correcting In the limit if there is one the book should approach a correct state It is not the detail and the numbers that matter but the structures and the order These structures are inherently linked with the many minds that have made Maple the minds of perhaps the best mathematicians certainly some of the most useful Our environment is not separate from

mathematics mathematics is but one tool of several to help with understanding the environment It is a harsh tool that requires numbers and symbolism Maple handles the symbolism superbly numbers need more consideration We have included a substantial amount on reading and writing numbers data and dealing with floating point numbers It is the devil in the detail that continually comes back to us in working with Mathematics and Maple It becomes raw and defined Many of the things we do have rational and logical bases but we don't know what they are Often in following the code and talking with an input line to Maple the detailed way of performing a task becomes clear But not without frustration the task is invariably simple though

The Emotional Politics of Social Work and Child Protection Joanne Warner, 2015-01-12 Social work and child protection systems have for several decades been subject to cycles of crisis and reform with each crisis drawing intense media and political scrutiny In this book Joanne Warner argues that to understand the nature of these cycles we have to pay attention to the importance of collective emotions such as anger shame and fear To do so she introduces the concept of emotional politics Using a range of cases from the United Kingdom the United States the Netherlands and New Zealand Warner reveals that collective emotions are central to constructions of risk and blame and that they are generated and reflected by official documents politicians and the media She also suggests strategies for challenging emotional politics including identifying models for a more politically engaged stance for the social work profession

Incorporating Texts into Institutional Ethnographies Dorothy E. Smith, Susan Marie Turner, 2014-05-27 In *Incorporating Texts into Institutional Ethnographies* Dorothy E. Smith and Susan Marie Turner present a selection of essays highlighting perhaps the single most distinctive feature of the sociological approach known as Institutional Ethnography IE the ethnographic investigation of how texts coordinate and organize people's activities across space and time The chapters written by scholars who are relatively new to IE as well as IE veterans illustrate the wide variety of ways in which IE investigations can be done as well as the breadth of topics IE has been used to study Both a collection of examples that can be used in teaching and research project design and an excellent introduction to IE methods and techniques *Incorporating Texts into Institutional Ethnographies* is an essential contribution to the subject

Teaching Tainted Lit Janet G. Casey, 2015-11-15 Popular American fiction has now secured a routine position in the higher education classroom despite its historic status as culturally suspect This newfound respect and inclusion have almost certainly changed the pedagogical landscape and *Teaching Tainted Lit* explores that altered terrain If the academy has historically ignored or even sneered at the popular then its new accommodation within the framework of college English is noteworthy surely the popular introduces both pleasures and problems that did not exist when faculty exclusively taught literature from an established high canon How then does the assumption that the popular matters affect teaching strategies classroom climates and both personal and institutional notions about what it means to study literature The essays in this collection presume that the popular is here to stay and that its instructive implications are not merely noteworthy but richly nuanced and deeply compelling They address a broad variety of issues concerning canonicity literature

genre and the classroom as its contributors teach everything from Stephen King and Lady Gaga to nineteenth century dime novels and the 1852 best seller Uncle Tom's Cabin. It is no secret that teaching popular texts fuels controversies about the value of cultural studies, the alleged relaxation of aesthetic standards and the possible dumbing down of Americans. By implicitly and explicitly addressing such contentious issues, these essays invite a broader conversation about the place of the popular not only in higher education but in the reading lives of all Americans.
