The Audit Society Rituals Of Verification:

The Audit Society Michael Power (Professor of Accounting), 1997 Since the early 1980s there has been an explosion of auditing activity in the UK and North America Power looks at why this has happened and asks what it means for society when more and more individuals are subject to formal scrutiny *The Audit Society: Rituals of Verification* Michael Power, 1997-07-03 Since the early 1980s there has been an explosion of auditing activity in the United Kingdom and North America In addition to financial audits there are now medical audits technology audits value for money audits environmental audits quality audits teaching audits and many others Why has this happened What does it mean when a society invests so heavily in an industry of checking and when more and more individuals find themselves subject to formal scrutiny The Audit Society argues that the rise of auditing has its roots in political demands for accountability and control At the heart of a new administrative style internal control systems have begun to play an important public role and individual and organizational performance has been increasingly formalized and made auditable Michael Power argues that the new demands and expectations of audits live uneasily with their operational capabilities Not only is the manner in which they produce assurance and accountability open to question but also by imposing their own values audits often have unintended and dysfunctional consequences for the audited organization The Closing of the Auditor's Mind? David J. O'Regan, 2024-12-10 In *The Closing of the Auditor's Mind* author David J O'Regan describes internal auditing as an important binding agent of social cohesion for the accountability of individuals and organizations and also at aggregated levels of social trust However O'Regan also reveals that internal auditing faces two severe challenges an external challenge of adaptation and an internal challenge of fundamental reform The adaptation challenge arises from ongoing paradigmatic shifts in accountability and social trust The command and control vertical hierarchies of traditional bureaucracies are being replaced in importance by networked flattened patterns of accountability The most challenging assurance demands of the modern era are increasingly located in three institutional domains in the inner workings of organizations in intermediary spaces at organizational boundaries and in extra mural locations Internal auditing continues to cling barnacle like to the inner workings of traditional bureaucratic structures and it has little to offer the emerging assurance demands on or beyond institutional boundaries The reform challenge arises from internal auditing's prevailing tendency toward a rigid algorithmic checklist mindset that suppresses practitioners creativity and critical thinking This trend is increasingly narrowing internal auditing's intellectual and moral horizons Under the pressures of these challenges internal auditing is struggling to fulfil its primary purpose of serving the public interest O'Regan's powerful book focuses on The redistribution of social trust from traditional hierarchical institutions to diffuse horizontally distributed networks The perennial validity of the classical virtues as the humane foundation of professional activity The role of creative expertise in promoting professional wisdom *The Closing of the Auditor's Mind* is a philosophical audit of a profession on the threshold of crisis The book presupposes no prior knowledge of

philosophy nor indeed of auditing Philosophical technicalities are contained in an Appendix leaving the main text jargon free O Regan provides original and striking perspectives on the malaise of modern internal auditing and he proposes radical remedies This captivating and well informed book is a must read for all who are concerned with our collective socio economic and political well being **The Added Value of Auditing in a Non-Mandatory Environment** Hans Duits,2025-10-01

What is the raison d'être of auditing Does auditing only exist by the grace of the legislator Or does auditing fulfill other needs in contemporary society For many companies auditing has been made mandatory This is possibly one of the reasons why researchers to date have given limited attention regarding the drivers for the demand for audit Auditing seen as a social control mechanism is part of an organizational order in society Therefore it is essential to reflect on the changing demands of society As a lack of insight why society demands an audit accommodates the risk of not meeting the needs and expectations of society the added value of auditing may be called into question This dissertation deals with the question what are drivers for the demand for audit for Dutch SME companies which are not mandatory required to have their financial statements audited The Oxford Handbook of Critical Management Studies Mats Alvesson,Todd Bridgman,Hugh Willmott,2009-06-19 Critical Management Studies CMS has emerged as a movement that questions the authority and relevance of mainstream thinking and practice Critical of established social practices and institutional arrangements it challenges prevailing systems of domination and promotes the development of alternatives to them CMS draws upon diverse critical traditions Of particular importance for its initial articulation was the thinking of members of the Frankfurt School of Critical Theory From these foundations CMS has grown into a pluralistic and inclusive movement incorporating a diverse range of perspectives ranging from labour process theory to radical feminism In recent times a set of ideas broadly labelled poststructuralist have been developed to complement and challenge the insights of Critical Theory giving new impetus for scholars seeking to challenge the status quo and articulate a more inclusive and humane future for management practice The Oxford Handbook of Critical Management Studies provides an overview of theoretical approaches key topics issues and subject specialisms in management studies as well as a set of reflections on the progress and prospects of CMS Contributors are all specialists in the respective fields and share a concern to interrogate and challenge received wisdom about management theory and practice Given the rapid growth of the CMS movement its ever increasing theoretical and geographical diversity and its outreach into the public sphere The Oxford Handbook of Critical Management Studies is a timely publication In addition to UK contributors where CMS has developed most rapidly there is strong representation from North American contributors as well as from areas where CMS has taken hold more recently such as Australasia Education and the Risk Society Steven Bialostok,Robert Whitman,William Bradley,2012-12-23 Sociological and anthropological literature has examined how contemporary western society has become a risk society Education and the Risk Society is the first volume to explore this seminal concept through the lens of education Drawing on a theoretical literature that has great potential as a lens to view

changes in neoliberal discourses of global capitalism from both critical and generative perspectives Education and the Risk Society presents situated empirical studies investigating an uncertain world as people practice it on the ground through language and activity within educational settings *Accounting and Auditing in China* Mark A. Clatworthy, Juan Manuel García Lara, Edward Lee, 2025-02-12 This book is a curated compilation of research articles exploring compelling issues associated with accounting and auditing in China China is one of the leading emerging countries in the world It has experienced rapid growth over the past few decades and plays a key role in the global economy Accounting information contributes to China's economic development by facilitating the engagement of firms with investors governmental agencies and other stakeholders Given the changing regulatory and economic landscape in China the experiences and challenges of Chinese accounting and auditing offer useful insights to academics practitioners and policymakers around the world Against this backdrop there is an increasingly large and continuously growing academic literature on China related accounting and auditing The chapters in this volume showcase how accounting information relates to a wide spectrum of important issues including carbon emissions international trade and the supply chain It also considers the development of the audit market in China and highlights important future directions for accounting researchers interested in China related studies This book will be relevant for students and professionals of accounting auditing finance and international business It will be particularly useful for researchers policymakers and practitioners seeking to understand the nuances of China's financial practices and their broader implications The chapters in this book were originally published in *Accounting and Business Research*

Constitutionalism beyond Liberalism Michael W. Dowdle, Michael A. Wilkinson, 2017-01-26 Constitutionalism beyond Liberalism bridges the gap between comparative constitutional law and constitutional theory The volume uses the constitutional experience of countries in the global South China India South Africa Pakistan Indonesia and Malaysia to transcend the liberal conceptions of constitutionalism that currently dominate contemporary comparative constitutional discourse The alternative conceptions examined include political constitutionalism societal constitutionalism state based Rousseauian conceptions of constitutionalism and geopolitical conceptions of constitutionalism Through these examinations the volume seeks to expand our appreciation of the human possibilities of constitutionalism exploring constitutionalism not merely as a restriction on the powers of government but also as a creating collective political and social possibilities in diverse geographical and historical settings **Performance Auditing** Jeremy Lonsdale, Peter Wilkins, Tom Ling, 2011-01-01 It is time 15 years on from the coining of the Audit Explosion to re appraise the growth of new forms of auditing As we move into what might be called Auditing in Austerity this book gives us that overview An extremely well informed team of authors has been assembled to deliver a comparative analysis that successfully mixes insider and outsider perspectives This should be required reading not just for auditors and their academic hangers on but for the wider audience of those interested in contemporary developments in democratic accountability and policymaking Christopher Pollitt Catholic University of Leuven

Belgium This book fills an important gap in the market At a time when governments around the world face the largest deficits in decades there is a strong need to reduce public expenditures whilst ensuring greater value for money from public services This book addresses these concerns and many more Each of the chapter authors is a senior practitioner and or an academic who specialises in performance auditing and accountability in modern complex democracies They explore the nature of the concepts which underlie current practice set out a variety of institutional structures and processes and identify the limits of both theory and practice These make this a book of considerable significance and one which makes an important contribution to our understanding of the democratic process This is not a narrowly focused book only of interest to those who specialise in performance auditing Given the richness of its analysis and the fine grained understanding of institutions and processes it has much to say to students of public administration management and policy analysis I am confident that this will rapidly become the standard reference for those who are interested in performance auditing Peter M Jackson AcSS University of Leicester UK What a good read Insightful and challenging It is likely to incite a lot of discussion on the wide ranging views from the very well informed and qualified contributors not least from those who actually have to implement the findings and recommendations of performance audit reports The focus is rightly on accountability for performance not only in achieving government program objectives in an economic efficient and effective manner but also on the audit institutions themselves It should be welcomed by the public sector and particularly by the parliamentary institutions concerned with achieving accountability for government performance Pat Barrett AO Australian National University and former Australian Auditor General 1995 2005 This book is a much welcome tonic for public administration It is one of the few books that explicitly focus on how audit institutions carry out their performance auditing responsibilities While auditors will likely read this the authors have geared the book to a broader readership including public managers who are often the subject of performance audits From the foreword by Paul Posner George Mason University US This state of the art book examines the development of performance audit drawing on the experience in a number of different countries including the United Kingdom the United States Australia the Netherlands and Belgium The expert contributors identify the trajectory of performance audit examine how it is conducted and consider what it is contributing to effective government They conclude that in the face of new challenges performance auditors should focus both on their core responsibilities to ensure accountability and continue to develop more insightful and sophisticated approaches to enable them to assess the growing complexity of the delivery of public services By doing so they can continue to play a valuable role in democratic accountability Providing an up to date overview and discussion of performance audit this highly topical book will appeal to all those working within audit academics working in the fields of public management and public administration as well practitioners in and close to state audit institutions Members of Parliament evaluators internal auditors researchers policy analysts and consultants will also find this book invaluable **Organized Uncertainty** Michael Power, 2007-05-24 Since the

mid 1990s risk management has undergone a dramatic expansion in its reach and significance being transformed from an aspect of management control to become a benchmark of good governance for banks hospitals schools charities and many other organizations Numerous standards for risk management practice have been produced by a variety of transnational organizations While these many designs and blueprints are accompanied by ideals of enterprise value production and good governance it is argued that the rise of risk management has also coincided with an intensification of auditing and control processes The legalization and bureaucratization of organizational life has increased because risk management has created new demands for proof and evidence of action In turn these demands have generated new risks to reputation In short this important book traces the rise of the managerial concept of risk and the different logics and values which underpin it showing that it has much less to do with real dangers and opportunities than might be thought and more to do with organizational accountability and legitimacy

Virtual Society? Steve Woolgar, 2002 This work investigates the precise effects on society of the new and much vaunted electronic technologies ICTs Are fundamental shifts already taking place in the way in which we behave organize and interact as a direct result of their implementation Providing a comprehensive set of detailed empirical studies of the genesis and use of these new technologies the book also presents some surprising counterintuitive results

Professionalism and Accounting Rules Brian P. West, 2003-04-17 This book investigates the issues raised by the vast array of accounting standards and technical rules which have marked the recent history of accounting It is argued that the accounting profession is beset by an inferior and incomplete notion of quality in its work which emphasises compliance with processing rules rather than the correspondence with commercial phenomena necessary to make financial statements reliable guides for human activity

Algorithmic Reason Claudia Aradau, Tobias Blanke, 2022-04-25 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Are algorithms ruling the world today Is artificial intelligence making life and death decisions Are social media companies able to manipulate elections As we are confronted with public and academic anxieties about unprecedented changes this book offers a different analytical prism through which these transformations can be explored Claudia Aradau and Tobias Blanke develop conceptual and methodological tools to understand how algorithmic operations shape the government of self and other They explore the emergence of algorithmic reason through rationalities materializations and interventions and trace how algorithmic rationalities of decomposition recomposition and partitioning are materialized in the construction of dangerous others the power of platforms and the production of economic value The book provides a global transdisciplinary perspective on algorithmic operations drawing on qualitative and digital methods to investigate controversies ranging from mass surveillance and the Cambridge Analytica scandal in the UK to predictive policing in the US and from the use of facial

recognition in China and drone targeting in Pakistan to the regulation of hate speech in Germany

The Organization of the Expert Society Andreas Werr, Staffan Furusten, 2016-12-01 It is often claimed that we live in an expert society a society where more and more individuals take expert roles in increasingly narrow fields In contrast to more traditional experts most of these new experts lack generally accepted mechanisms for the certification and legitimation of their expertise This book focuses on these new as well as established experts and the efforts undertaken to secure and legitimate their expertise We view these efforts as organizing attempts and study them on four different levels the society the market the organization and the individual Based on empirical studies on these four levels of analysis The Organization of the Expert Society makes the argument that current organizing initiatives in the expert society are based in an objectifying view of expertise that risks concealing and downplaying key aspects of expertise Well intended organizing initiatives in the expert society thus run the risk of promoting ignorance rather than securing expertise Focusing on a current general and global phenomenon the rise and organization of an expert society The Organization of the Expert Society will be key reading for scholars academics and policy makers in the management fields of Organizational Theory Management Consulting Organizations Society Critical Management Studies as well as the disciplines of Sociology Political Science and Social Anthropology

Administrative Justice in Context Michael Adler, 2010-04-30 This book comprises a definitive collection of papers on administrative justice written by a set of very distinguished contributors It is divided into five parts each of which contains articles on a particular aspect of administrative justice The first part deals with the impact of contextual changes on administrative justice and considers the implications of changes in governance and public administration management and service delivery information technology audit and accounting and human rights for administrative justice The second part deals with conceptual issues and describes a number of competing approaches to the administrative justice The third part deals with the application of administrative justice principles to private law disputes while the fourth part deals with the distinctive characteristics of administrative justice in three other jurisdictions The final part deals with current developments in administrative justice and the book concludes with a discussion of legislative and policy developments in the UK The general approach of the book is socio legal and interdisciplinary The chapters adopt a variety of disciplinary perspectives including those derived from political science public policy social policy accounting and information technology as well as from law Although most of the contributors are academics some are practitioners For these reasons the book should be of interest to lawyers particularly those with interests in administrative law and to social scientists particularly those with interests in public administration public policy and public management

Education and the Good Society F. Inglis, 2004-03-31 The many public debates launched by governments on education such as Tony Blair's emphasis on education education education have nonetheless failed to consider the place of the good society in educational endeavour The traditional account of education is that it not only teaches pupils the skills to earn a living but also teaches a concern for the welfare of others a love of the many cultures

of learning and a commitment to the best values of society Education and the Good Society seeks to examine these considerations and to restore them to the centre of the educational debate *Transactions of the Royal Historical Society: Volume 16* Ian W. Archer, 2007-03-12 The Transactions of the Royal Historical Society publish an annual collection of major articles representing some of the best historical research by some of the world's most distinguished historians The volume includes the following articles Potential Address Britain and Globalisation since 1850 I Creating a Global Order 1850 1914 Land Freedom and the Making of the Medieval West The Origins of the English Hospital The Alexander Prize Essay Trust and Distrust A Suitable Theme for Historians Witchcraft and the Western Imagination Africa and the Birth of the Modern World The Break Up of Britain Scotland and the End of the Empire The Prothero Lecture Report of Council for 2005 2006 **The Mutual Construction of Statistics and Society** Ann Rudinow Saetnan, Heidi Mork Lomell, Svein Hammer, 2010-09-13 What we choose to count what we choose not to count who does the counting and the categories and values we choose to apply when counting matter This volume addresses why and how students and scholars must become more aware of the power and the limitations of statistics **Developments in Israeli Public Administration** Moshe Maor, 2014-02-25 The Israeli History Politics and Society series comprises multidisciplinary studies that range from elections and the Yom Kippur war to the search for a true Israeli identity and the various initiatives to foment or prevent the peace process This volume brings together a set of articles that try to estimate the direction of developments in Israeli public administration whether ministries will remain under the ambit of the Weberian model follow the New Public Management model or move towards a mix of the two Each essay focuses on a specific factor which may inhibit reforms such as the weakness of mechanisms for policy control monitoring and evaluation lack of co ordination between the different ministries lack of effective accountability mechanisms an administrative culture that is characterized by frequent infringements of moral integrity a high level of politicization and a Supreme Court which plays a paramount role by routinely intervening in the practices of public administration as well as in the business of other governmental and non governmental institutions Each article probes how these distinctive features of Israeli public administration reflect underlying traits of the nation's history culture and geography and gauges the extent to which formal structures provide an indication of how policy making and programme implementation really operate
