Motherload Ana Villalobos,2014-09-05 Motherload s core arguments are that security seeking is the driving force of intensive mothering and that high expectation of security in the mother child relationship i e the motherload is what makes mothering so difficult today It further argues that the motherload carried with every good intention to produce security through this one uniquely powerful relationship can unintentionally undermine families security Strategies of producing security vary fundamentally along two dimensions First some strategies use mother child connection as the primary security producing tool whereas others use independence Second some strategies are intended to provide security to the child while others are aimed primarily at the mother s security So for example one mother may use independence to create security for her child and another may use connection to create security for herself Motherload explores this variety of security strategies

and argues against a one size fits all understanding of intensive mothering For each of these different strategies I include a chapter to explore the various factors that predispose women toward mothering in that particular way the family dynamics that security strategy tends to foster and the early outcomes associated with that strategy including how the mother child relationship itself tends to fare when a woman uses that strategy as versus another Provided by publisher
