Clark,Per-Anders Edin,Peter Fredricksson,Alan B. Krueger,2006-01-09 A large central government providing numerous public services has long been a hallmark of Swedish society which is also well known for its pursuit of equality Yet in the 1990s Sweden moved away from this tradition in education introducing market oriented reforms that decentralized authority over public schools and encouraged competition between private and public schools Many wondered if this approach would improve educational quality or if it might expand inequality that Sweden has fought so hard to hold down In *The Market Comes to Education in Sweden* economists Anders Bjorklund Melissa Clark Per Anders Edin Peter Fredriksson and Alan Krueger measure the impact

of Sweden's bold experiment in governing and help answer the questions that societies across the globe have been debating as they try to improve their children's education. *The Market Comes to Education* in Sweden injects some much needed objectivity into the heavily politicized debate about the effectiveness of educational reform. While advocates for reform herald the effectiveness of competition in improving outcomes, others suggest that the reforms will grossly increase educational inequality for young people. The authors find that increased competition did help improve students' math and language skills but only slightly and with no effect on the performance of foreign born students and those with low educated parents. They also find some signs of increasing school segregation and wider inequality in student performance but nothing near the doomsday scenarios many feared. In fact, the authors note that the relationship between family background and school performance has hardly budged since before the reforms were enacted. The authors conclude by providing valuable recommendations for school reform such as strengthening school evaluation criteria which are essential for parents, students, and governments to make competent decisions regarding education. Whether or not the market oriented reforms to Sweden's educational system succeed will have far reaching implications for other countries considering the same course of action. *The Market Comes to Education* in Sweden offers firm empirical answers to the questions raised by school reform and brings crucial facts to the debate over the future of schooling in countries across the world. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies, 2002. **Resources in Education**, 2001-10. **Efficiency, Accountability, and Equity**. Margaret C. Wang, Kenneth K. Wong, 2002-06-01. How efficient is Title I, the largest federal educational program in elementary and secondary schools? What is the quality of the Title I services? Has Title I promoted equity in schools among our nation's low income areas? To address these important issues, this volume draws on the proceedings of two national invitational conferences sponsored by the mid Atlantic regional educational laboratory, the Laboratory for Student Success (LSS) at Temple University Center for Research in Human Development and Education in 1999 and 2000. These conferences aim to provide research based information on how Title I schoolwide programs affect teaching, learning, and student outcomes and to strengthen cost benefits in Title I program implementation to assist students in high poverty schools. The focus of the conferences is particularly timely in view of the upcoming Title I reauthorization and the recently enacted federal Comprehensive School Reform Demonstration (CSRD) initiative. Discussion at the conferences focused on enhancing our understanding of accountability, efficiency, and equity issues in Title I. More specifically, researchers at the two conferences highlighted findings from the National Study of Effective Title I Schoolwide Programs, b) examined the effects of research based comprehensive reform models in high poverty schools, and c) addressed cross cutting issues such as the productivity of Title I programs, the use of technologies in the classroom, the role of the state in strengthening Title I programs, cost

effectiveness of whole school reform professional development reading instruction and parental involvement which are important parts of the national educational reform agenda Leading researchers policymakers and practitioners were commissioned to develop preconference papers to serve as a springboard for discussion at the conferences These papers included an overview of the research base and patterns of governance and conditions that lead to effective implementation of Title I schoolwide programs The papers were reviewed by conference participants before the conferences and were used to develop next step recommendations for advancing the implementation of the Title I schoolwide provision
