Rocco, 2014-02-05 Revolution not reform is required to release the power of teaching. Virtually all teachers possess tremendous power which can be released given the proper exposure. We can't get to that point by tinkering with a broken system. We must change our intellectual structures, definitions and assumptions then we can release teacher power. Hilliard, 1997 This book was written during a time of growing upheaval and disagreement about how America should educate its students, particularly those who are poor, diverse and failing school. Dominant educational research, newspapers and popular movies such as *Waiting for Superman* continually fuel public debates about whether our 21st century schools provide justice for all, decrease the achievement gap and leave no child behind. However, even though one of teachers' greatest concerns and why many leave the profession, classroom discipline is rarely brought to the forefront of discussion. As a result, public discourse does not get into what actually happens during disciplinary moments that ultimately leads to the disproportional tracking of particular students into exclusionary school disciplinary consequences which funnels an underclass of students into the school-to-prison pipeline. This book is a scholarly study presented here as a readable story and practical guide for walking teachers, administrators and teacher education programs through the process of transforming traditional ways of thinking about classroom discipline and teaching in order to create student-centered, creative, non-punitive classrooms that authentically engage the most alienated and oppressed students in our schools and society.

### **Born to Buy** Juliet B.

Schor, 2014-08-19 Ads aimed at kids are virtually everywhere in classrooms and textbooks on the Internet, even at slumber parties and the playground. Product placement and other innovations have introduced more subtle advertising to movies and television. Companies are enlisting children as guerrilla marketers targeting their friends and families. Even trusted social institutions such as the Girl Scouts are teaming up with marketers. Drawing on her own survey research and unprecedented access to the advertising industry, New York Times bestselling author and leading cultural and economic authority Juliet Schor examines how a marketing effort of vast size, scope and effectiveness has created commercialized children. Schor, author of *The Overworked American* and *The Overspent American*, looks at the broad implications of this strategy. Sophisticated advertising strategies convince kids that products are necessary to their social survival. Ads affect not just what they want to buy but who they think they are and how they feel about themselves. Based on long-term analysis, Schor reverses the conventional notion of causality: it's not just that problem kids become overly involved in the values of consumerism; it's that kids who are overly involved in the values of consumerism become problem kids. In this revelatory and crucial book, Schor also provides guidelines for parents and teachers. What is at stake is the emotional and social well-being of our children.
