

CHAPTER 11 STARS AND GALAXIES IN THE UNIVERSE

Learning Outcomes:

1. To learn about the stars and galaxies in the Universe

11.1 Stars and galaxies in the universe

1. Astronomy is a field that studies space matter, galaxies, stars and other objects in outer space.
2. Besides stars and planets, other objects in the universe include comets, meteorites and also asteroids.
3. The invention of telescopes has enabled scientists to investigate the objects in space in great detail.

Galaxies

1. A galaxy is a collection of bodies made up of billions of stars, planets, dust and gases held together by the gravitational force. It is said that approximately 10-20% of the galaxy components are made up of space objects, stars and dust while 80-90% is made up of dark matter.
2. Galaxies are classified based on their shapes. Generally, they are divided into three shapes:
 - a. Elliptical galaxy
 - Oval or round shaped, almost flat from the perspective of an astronomer.
 - Consists of old and dimmer yellow stars
 - Lower in temperature
 - Smaller than spiral and irregular galaxies
 - Messier 87, Leo I in the Local Group, Ursa Major

More Than a Theory (Reasons to Believe) Hugh Ross,2009-03-01 The year 2009 marks the 150th anniversary of the publication of Charles Darwin s *On the Origin of Species* Alongside that event there are many Darwin Day celebrations planned to acknowledge his 200th birthday Add to these the virulent attacks of the New Atheists led by Richard Dawkins Bible believing Christians will be left increasingly challenged with the theory of evolution as the only model to explain the origins and age of the universe In *More Than a Theory* Hugh Ross founder and president of Reasons To Believe offers discerning readers a comprehensive testable creation model to consider as an alternative This fascinating resource will educate readers with a direct response to the recent and well publicized challenges from aggressive atheists In doing so it also reminds the scientific community of what constitutes good science Furthermore it will supply Christians with the scientific information they need to defend their convictions that the God of the Bible is the Creator Complete with several appendices that put common documents and stories to the same test *More Than a Theory* is a bold brave and unapologetic work of apologetics that will stir much discussion in both the scientific and religious realms

Resources for Teaching Middle School Science Smithsonian Institution,National Academy of Engineering,National Science Resources Center of the National Academy of Sciences,Institute of Medicine,1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them *Resources for Teaching Middle School Science* developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the

National Science Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents , **The Complete Home Learning Sourcebook** Rebecca Rupp,1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level [Dark Matter, Missing Planets and New Comets](#) Tom Van Flandern,1999-01-08 Tom Van Flandern s book adds a new dimension to cosmology not only does it present a novel approach to timeless issues it stands up to the closest scientific scrutiny Even the most respected scientists today will readily admit that the Big Bang Theory is full of holes But it takes a new look like Dark Matter Missing Planets and New Comets to explain not only why the theory is wrong but what to substitute in its place If you are curious about such things as the nature of matter and the origin of the solar system but feel inadequately equipped to grasp what modern science has to say about such things read this book You will not get the all too common condescending attempt to water down the mysteries of modern science into a form intelligible to little non scientist you but rather a straightforward new theory logically derived in front of your eyes which challenges the roots of many of today s complex accepted paradigms yet whose essence is simple enough to be thoroughly communicated to the intelligent layman without losing it in the translation **Realm of the Universe** George Ogden Abell,David Morrison,Sidney C.
