

The Automatic Seduction System Review

This method works...

- Even if you're totally shy and not in the mood to talk to anybody
- Even if you're absolutely terrified of approaching women (Approaching isn't required, did you know that?)
- Even if you're drunk (well, it happens)

Many men are worried about a physique and personality when it comes to having a relationship with women.

Speech and System Peter Bornedal, 1997 In this investigation creative writing and philosophy are shown to be specific types of language games distinct from speech as used in communicative interaction between individuals The author deals with thinking speech and systems respectively I Thinking is understood as a soliloquy preceding any kind of creative activity and any kind of writing The author analyses thinking as a subject's listening to its own voice with a split between I and me close to Derrida's notion of difference as a condition for the production of meaning II Analyzing with reference to Benveniste Austin and Searle what speech is the author deduces the so-called pragmatic subject in contrast to the first section's reflective In its elementary speech act the pragmatic subject does constitute itself in rudimentary ways III In dealing with the product of reflective activity the author finds the so-called textual inconsistency or logical aporias inherent in any logical or pseudo-logical system to be in line with Gödel's incompleteness theorems and he rejects the tendency to use deconstruction to understand these aporias as is usual in Western metaphysics The author's philosophical position is closest to that of Paul Ricoeur and Jacques Derrida but on crucial issues he advances his own ideas on the relationship between speech and writing also establishing a criticism of metaphysics that may be more radical than what has previously been developed
