Advancement of Science British Association for the Advancement of Science,1858 **The Rise and Fall of Neoliberal Rentier Capitalism** Luiz Carlos Bresser-Pereira,2025-02-10 The Rise and Fall of Neoliberal Rentier Capitalism is an account of the political economy of capitalism in the 20th and 21st centuries Capitalism is an unjust form of economic organisation it is a culture of exacerbated individualism justified by the glorification of individual competition Today after 40 years of neoliberalism capitalism faces again a legitimisation crisis The book discusses capitalism after two revolutions the Organisational Revolution and the Democratic Revolution It views capitalism since the New Deal in the US and the post war as a progressive and developmental era and the Neoliberal Turn as the change from social democracy to radical and regressive global neoliberalism which was a regressive time for almost forty years In the Neoliberal Years rentiers replaced entrepreneurs in the command of the economy and called on the financiers to manage their wealth and serve as organic intellectuals and both mounted an attack to the state which is the main capitalist institution The global crisis and in 2020 the Covid pandemic showed that the state remains the nations resource of last instance The transition of China from statism to an active developmentalism resulted in an extraordinary growth Given such realities in 2021 we saw the collapse of neoliberalism and in the United States a Developmental Turn the state is back in the economy The transition phase we live in is characterised by three main forces economic liberalism managerialism and democracy Economic liberalism is the great defeated managerialism became powerful and is developmental and democracy is the stronger force It was attacked by neoliberalism and is now being attacked by right wing populism but resisted and resists brilliantly proving that it was a conquest of the popular classes that became a universal value counting on the support of all social classes **The Rise and Fall of Catholic Religious Orders** Patricia Wittberg,1994-01-01 A sociological analysis of the periodically recurring cycles of Roman Catholic religious life applying the theories and research on large scale social movements and on the internal dynamics of other intentional communities to the data presented in historical works on specific periods Following an introductory chapter The Extent of the Problem **Report of the Twenty-Seventh Meeting of the British Association**

Mid 20th century America envisioned a wondrous future of comfort convenience and technological advancement Popular culture including World's Fairs science fiction and advertising fed high hopes even when war and hardship threatened American ingenuity and consumer culture promised to deliver flying cars undersea cities household robots and space travel By the 1960s political assassinations the civil rights and women's movements the Vietnam War and the generation gap eroded that optimism refocusing attention on the issues of the present The nation's utopian dream was brief but revealing Based on a wide range of sources this book takes a fresh look at America's precipitous fall from futurism to disillusionment
