Katz, 2017-07-28 Social critics and artificial intelligence experts have long prophesized that computers and robots would soon relegate humans to the dustbin of history Many among the general population seem to have shared this fear of a dehumanized future But how are people in the twenty first century actually reacting to the ever expanding array of gadgets and networks at their disposal Is computer anxiety a significant problem paralyzing and terrorizing millions or are ever proliferating numbers of gadgets being enthusiastically embraced *Machines that Become Us* explores the increasingly intimate relationship between people and their personal communication technologies In the first book of its kind internationally recognized scholars from the United States and Europe explore this topic Among the technologies analyzed include the Internet personal digital assistants PDAs mobile phones networked homes smart fabrics and wearable computers interactive location badges and implanted monitoring devices The authors discuss critical policy issues such as the problems of information resource access and equity and the recently discovered digital dropouts phenomena The use of the word

become in the book's title has three different meanings. The first suggests how people use these technologies to broaden their abilities to communicate and to represent themselves to others. Thus the technologies become extensions and representatives of the communicators. A second sense of become applies to analysis of the way these technologies become physically integrated with the user's clothing and even their bodies. Finally contributors examine fashion aspects and uses of these technologies that is how they are used in ways becoming to the wearer. The conclusions of many chapters are supported by data including ethnographic observations, attitude surveys and case studies from the United States, Britain, France, Italy, Finland and Norway. This approach is especially valuable.

Media Laboratories Sarah Ann Wells, 2017-02-15
Winner LASA Best Book Published in 2017 Southern Cone Section Humanities category
Media Laboratories explores a pivotal time for South American literature of the 1930s and 40s. Cinema, radio and the typewriter once seen as promising catalysts for new kinds of writing began to be challenged by authors, workers and the public. What happens when media no longer seem novel and potentially democratic but rather consolidated and dominant? Moving among authors from Brazil, Argentina and Uruguay and among the genres of fiction, the essay, popular journalism and experimental little magazines, Sarah Ann Wells shows how writers on the periphery of global modernity were fashioning alternative approaches to these media. Analyzing authors such as Clarice Lispector, Jorge Luis Borges and Felisberto Hernández along with their lesser known contemporaries, *Media Laboratories* casts a wide net from spectators of Hollywood and Soviet montage films to inventors of imaginary media to proletarian typists who embodied the machine-human encounters of the period. The text navigates contemporary scholarly and popular debates about the relationship of literature to technological innovation, media archaeology, sound studies, populism and global modernisms. Ultimately Wells underscores a question that remains relevant: what possibilities emerge when the enthusiasm for new media has been replaced by anxiety over their potentially pernicious effects in a globalizing yet vastly unequal world.

Human-Robot Intimate Relationships Adrian David Cheok, Emma Yann Zhang, 2019-02-12
The idea of humans falling in love with artificial beings is not a modern conception. Our relationship with artificial partners has come a long way since Pygmalion and his ivory lover. In recent years there has been a strong upsurge of interest and discussions in the various aspects of intimate relationships between humans and artificial partners. This interest is evidenced by the increase in media coverage, TV documentaries and films on this topic as well as the active research efforts within the academic community. This book provides a comprehensive collection and overview of the latest development in the field of intimate relationships between humans and artificial partners, in particular robots and virtual agents. It includes relevant research work undertaken by the authors, the latest advancements in technology and commercial products and future predictions and insights from leading experts in the area. This book contains an in-depth

discussion of the engineering philosophical psychological ethical and sociological implications of relationships with artificial companions It also gives a glimpse of some future directions of artificial intelligence human computer love and sexual interaction robotics engineering etc It is a great resource for researchers and professionals working in these areas The narrative style of the book also makes it an enjoyable and educational read for everyone *CONVIVIA FILTH* Vera Bühlmann ,Riccardo M.
