Documentation for Physical Therapist Practice Jacqueline A. Osborne, 2015-07-31 *Documentation for Physical Therapist Practice A Clinical Decision Making Approach* provides the framework for successful documentation. It is synchronous with Medicare standards as well as the American Physical Therapy Association's recommendations for defensible documentation. It identifies documentation basics which can be readily applied to a broad spectrum of documentation formats including paper-based and electronic systems. This key resource utilizes a practical clinical decision-making approach and applies this framework to all aspects of documentation. This text emphasizes how the common and standard language of the Guide to Physical Therapist Practice and the International Classification of Functioning Disability and Health (ICF) model can be integrated with a physical therapist's clinical reasoning process and a physical therapist assistant's skill set to produce successful documentation. Includes content on documentation formats: Initial Evaluations, Re-examination Notes, Daily Notes, Conclusion of the Episode of Care, Summaries, Home Exercise Program, Reviews. All the important issues related to style types of documentation and utilization of documentation. Covers documentation relevant in different settings: inpatient, home health, skilled nursing facility, outpatient. Helps students learn how to report findings and demonstrate an appropriate interpretation of results. Includes up-to-date information in line with APTA Guidelines for Defensible Documentation, World Health Organization International Classification of Functioning Disability and Health Model, and Medicare. Reviews electronic documentation, ICD-9, ICD-10, and CPT codes. Includes important chapters on Interprofessional Communication, Legal Aspects, Principles of Measurement. **Documentation for Rehabilitation - E-Book** Lori Quinn, James Gordon, 2024-04-12 Better patient management starts with better documentation. *Documentation for Rehabilitation 4th Edition* demonstrates how to accurately document treatment progress and patient outcomes using a framework for clinical reasoning based on the International Classification for Functioning Disability and Health (ICF) model adopted by the American Physical Therapy Association (APTA). The documentation guidelines in this practical resource are easily adaptable to different practice settings and patient populations in physical therapy and physical therapy assisting. Realistic examples and practice exercises reinforce the understanding and application of concepts, improving skills in both documentation and clinical reasoning. *Workbook* textbook format with examples and exercises in each chapter helps reinforce understanding of concepts. Coverage of practice settings includes documentation examples in acute care, rehabilitation, outpatient, home care, nursing homes, pediatrics, school, and community settings. Case examples for a multitude of documentation types include initial evaluations, progress notes, daily notes, letters to insurance companies, Medicare documentation, and documentation in specialized settings. **NEW** Movement Analysis Linking Activities and Impairments content addresses issues related to diagnosis. **NEW** An eBook version included with print purchase provides access to all the text, figures, and references with the ability to search, customize content, make notes, and highlights, and have content read aloud. Updated case examples provide clinical context for patient

documentation Revised content including updated terminology from the latest updates to the Guide to Physical Therapist Practice provides the most current information needed to be an effective practitioner Updated references ensure content is current and applicable for today's practice
