Building Literacy in Social Studies Donna Ogle, Ron Klemp, 2007-04-15 Preparing students to be active informed literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read let alone understand their social studies texts? What can educators and social studies teachers in particular do to help students develop the knowledge, skills, and motivation to become engaged in civic life? *Building Literacy in Social Studies* addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies including teaching models, graphic organizers, and step-by-step instructions for activities such as Building vocabulary, Developing textbook literacy skills, Interpreting primary and secondary sources, Applying critical thinking skills to newspapers and magazines, and Evaluating Internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.
