The Voynich Manuscript as an Example of Oligo-Agglutinative Pasigraphy, Vol. II: The Semantic Classification System

Steve Bolton, Class III problems are considered practically unsolvable in cryptology but none has resisted cryptanalytic attack as persistently as the Voynich Manuscript In the second installment of this 4 volume set we present the semantic classification system that preceded the first complete but approximate translation of the entire manuscript This contrasts with the piecemeal approach of all prior solutions that resulted in wildly diverent translations of minuscule selections of the text This systemic attack on the entirety of the text and its unusual distributional features such as extreme platykurtia which

forbid translation into any natural language resulted first in superior transcription stability and an equally stable symbol set based on intensive statistical analysis The encoding scheme employs a 20 22 letter alphabetic script that most closely resembles a slot and filler top down a priori pasigraphic system with oligo agglutinative features that are currently only considered a theoretical possibility in the linguistics field The intricate affixing system is based mainly on precise placement of single letters to denote case roles semantic classes and 3 primary parts of speech exhibiting a strong noun surfeit At the phrase level we find dominant SOV order and head final dependent marked grammar compatible with heavily formatted inline pharmaceutical lists these result in short ranges of actionable information which no competing solution can claim Plant descriptions are demoted in comparison to other herbals in favor of processing and dispensing details This approximate solution is based on fuzzy set analysis techniques integrated with linguistic universals a wide range of common statistics Pareto and Sukhotin scores Zipf slopes Indexes of Coincidence Agglutination and Synthesis and dozens of others and many home brewed fuzzy algorithms implemented in T SQL and VB Net after the inadequacy of many advanced data mining techniques was demonstrated Our methodology was validated when the project reached an inflection point beyond which we were able to predict the identities and properties of plants based on the text alone The project ended with plausible identification candidates for 121 of 126 herbal section plants and 7 others elsewhere in the manuscript far beyond that of other published solutions An incredible 100% of the 133 identified plants have dermatological uses These can be divided into prominent subtopics like treatment of bites anthelmintics rheumatism and other musculo skeletal ailments inflammatory skin disorders external and possibly menstrual bleeding excision of blemishes application of cosmetics and cures dispensable in baths The centerpiece of the manuscript is the Rosette Folio which depicts the grand design of a medieval bathhouse keyed to specific astrological timings also defined by satellite diagrams following a precedence hierarchy Each of these uses exhibit telltale polygraph correlations that fall into a handful of semantic hierarchies constructed from highly similar bases such as skin color based diagnostic criteria remedies solutions problems diseases plant parts and the like These findings require 2 volumes to demonstrate and another volume of data and other supplementary material Despite this complexity they culminate in a drastic simplification of the script and the first ever comprehensive translation of the Voynich Manuscript in Volume IV albeit at low resolution The first installment dedicated to linguistic analysis of the affixing system will be published concurrently with Vol II at which time the reference material in Vol III Dictionary Figures Tables and Other Supplementary Material will be made publicly available for free at the GitHub address <https://github.com/InfinidataLLC/Infinidata-Voynich-Manuscript-Project> *Astronomicon* M. Manilius, 2011-11-18 This volume contains the Latin text of the third book of Manilius first published in 1916 and then reissued in a second edition in 1937 [Encyclopedia Of Occult Sciences Vol. I Astrology](#) Poinso, Maffeo, 2015-05-13 It is because his work has been that of popularising and not of creating according to his account at least that the author has desired to remain anonymous and straightway I congratulate him on having so well

succeeded with this vade mecum which the scholar the woman of the world the man in the street the priest and the little maidservant will have on their table like a dictionary or a cookery book a perfect secretary in fact The task which I have before me is at once less difficult and more delicate Although in more than one passage our anonymous author shews originality expresses his opinion discusses and sometimes sums up nevertheless he asks me to explain beforehand what in fact the occult sciences are to state their connection with one another to relate briefly their general history to try to explain them shortly and finally to shew their usefulness
