The Greatest Story in the World (Complete) Horace G. Hutchinson, 1890-01-01 The greatest story in the world is the story of mankind around the Mediterranean Sea The reason why it is so great a story for us is that it is really our own story It is the story of the doings of mankind from the earliest date at which we know anything at all about man and it is the story of the doings which have made you and me what we are to day and have made our lives what they are You must first look at the world map to understand the story properly Take out the atlas or the globe of the world and have a look at the Mediterranean Sea as shown upon it You will see how very little space this sea occupies in comparison with the whole And I want you to observe this very particularly because as I hope to show you small though this space is it is the space in or closely around which nearly the whole story of man on the world so far as we know it was made up to what date shall we say only a few hundred years ago say the date of Columbus discovery of America If you know the story of what happened in and about the Mediterranean Sea you will know nearly all that anybody does know of the really important things that men did in the world up to the date of our Queen Elizabeth But you may say surely things were happening in other places as in China and in Peru and in Mexico and all over the world all the time And so there were things happening and things which made a very great difference no doubt to the people to whom they happened but they were things that made scarcely any difference at all so far as we are able to see to the history of the world They made great differences within the borders of the countries in which they happened but not beyond The happenings that went on round the shores of the Mediterranean were the making of the world as we know it to day I mean of course in so far as men s actions have had anything to do with the making of it For the first part of the story we shall be occupied with the eastern end only of the Mediterranean and I must ask you to carry your eye just a little not far to the east again of the eastern shore of that sea That shore is called the Levant from the Latin levare to rise and it means the region in which the sun was seen to rise by those who gave the name that is to say the East A very short way as it looks on the map of the Western Hemisphere to the east of that Levant shore you may see the two rivers Euphrates and Tigris rising very near together only a little south of the Black Sea yet not finding their way out into the sea till they have gone a very long way south Then after coming together they go out in each other s company into the Persian Gulf A great part of that space between the two rivers is called Mesopotamia and is the country where our armies had hard fighting in the Great War Mesopotamia is from Greek meaning the middle and a river and means the land in the middle of or between the two rivers Mediterranean the name of the big sea is from Latin medius meaning again the middle and terra the earth that is to say the sea in the middle of the land It is almost entirely shut in by the land its only way out being by the narrow Straits of Gibraltar at the western end
