

The Chinese Type 56:

Obvious features: T56's were produced in such quantity and for so long, that all the configurations couldn't possibly be listed on this quick ID guide. Some common features on all matching original guns are:

- Either blade or tri-lobe spike bayonets in the white.
- Arsenal stampings on the receiver near the S/N with a triangle, rectangle, oval, or diamond perimeter with a set of numbers inside. Some guns, however, have nothing but a serial number and import stamp with no arsenal mark of any kind.
- Side or bottom swivels on the stocks.
- Serial numbers are typically all numbers and can be as small as 4 digits or upwards of 9 digits. Sometimes there are letter codes after the S/N. Certain guns can have A-Y (minus Q & I) letters as a prefix to a four or five digit S/N, with C's and G's in a very odd block font that makes them look like Ç and Ğ's.
- "II", "D", "3", or "III" battle sight settings on the rear sight ladder.
- Stocks may be hardwood or laminate.

Barrels were originally 20 1/2" but exporters also cut barrels down to 18 1/2" and 16 1/2" versions for the commercial US market. Other options were also available in commercial variants such as the ability to accept AK style magazines, scope mounts, and bayonet-less guns to comply with the various US firearms laws of the 84-94 time period. If you see an SKS that can accept AK magazines, has a short 16 1/2" barrel, or has an optics rail professionally attached to the receiver, chances are pretty good that it's a Chinese gun.
