Author Deb Valainis has always felt the need to write even from an early age When asked to write the children s messages for her church to present during their Sunday morning worship services Deb was honored As she sat to write each week s message she felt each one to be God inspired with each one being tied to Bible scriptures She was pleasantly surprised to see that the messages seemed to have such a positive impact on children and adults alike An animated storyteller Deb made each story come alive often using props and hands on interaction with the children Oftentimes individuals would ask her where she acquired her stories and how people might get copies of them She was encouraged to put them into a book format for others to share and enjoy So having accumulated quite a large number of these messages or short stories Deb was finally convinced to combine a few of them into this first book in the hopes that they might serve to inspire others Whether used as a story time aid or as part of a family devotional her hope and prayer is that they will encourage others to read their Bibles each day as they seek a closer relationship with God and strive to follow His teachings 3 Bureau Publication ,1915

Edge-Based Clausal Syntax Paul M. Postal,2010-12-17 An argument that there are three kinds of English grammatical objects each with different syntactic properties In Edge Based Clausal Syntax Paul Postal rejects the notion that an English

phrase of the form V DP invariably involves a grammatical relation properly characterized as a direct object. He argues instead that at least three distinct relations occur in such a structure. The different syntactic properties of these three kinds of objects are shown by how they behave in passives, middles, able forms, tough movement, wh movement, Heavy NP Shift, Ride Node Raising, re prefixation, and many other tests. This proposal renders Postal's position sharply different from that of Chomsky, who defined a direct object structurally as NP VP and with the traditional linguistics text's definition of the direct object as the DP sister of V. According to Postal's framework, sentence structures are complex graph structures built on nodes, vertices, and edges, arcs. The node that heads a particular edge represents a constituent that bears the grammatical relation named by the edge label to its tail node. This approach allows two DPs that have very different grammatical properties to occupy what looks like identical structural positions. The contrasting behaviors of direct objects, which at first seem anomalous, even grammatically chaotic, emerge in Postal's account as nonanomalous, as symptoms of hitherto ungrasped structural regularity.
