The Coldest Crucible Arctic Exploration And American Culture:

The Coldest Crucible Michael F. Robinson, 2010-11-15 In the late 1800s Arctic Fever swept across the nation as dozens of American expeditions sailed north to the Arctic to find a sea route to Asia and ultimately to stand at the North Pole Few of these missions were successful and many men lost their lives en route Yet failure did little to dampen the enthusiasm of new explorers or the crowds at home that cheered them on Arctic exploration Michael F Robinson argues was an activity that unfolded in America as much as it did in the wintry hinterland Paying particular attention to the perils facing explorers at home *The Coldest Crucible* examines their struggles to build support for the expeditions before departure defend their claims upon their return and cast themselves as men worthy of the nation's full attention In so doing this book paints a new portrait of polar voyagers one that removes them from the icy backdrop of the Arctic and sets them within the tempests of American cultural life With chronological chapters featuring emblematic Arctic explorers including Elisha Kent Kane Charles Hall and Robert Peary *The Coldest Crucible* reveals why the North Pole a region so geographically removed from Americans became an iconic destination for discovery

The Coldest Crucible Michael Frederick Robinson, 2002 **A Frozen Field of Dreams, Science, Strategy, and the Antarctic in Norway, Sweden, and the British Empire, 1912-1952** Peder William Chellew Roberts, 2010 The dissertation examines how actors in Norway Sweden and the British Empire conceived the Antarctic as a space for science during the years 1912 to 1952 Instead of tracing a narrative of enlightenment how science became the dominant form of activity in the Antarctic I examine a series of episodes with particular attention to why particular kinds of science held sway within specific political cultural and economic contexts Concerned more with how Antarctic science was planned and justified than how it was executed in the field the project draws upon recent scholarship in geography and geopolitics as well as the history of exploration The six case studies involve an aborted Anglo Swedish Antarctic expedition in 1912 Britain's interwar Antarctic whaling research program debates among whaling magnates and their associates over the relationship between Antarctic science and whaling in interwar Norway the culture of polar exploration that emerged at Cambridge and to some extent Oxford between the world wars the approach to polar exploration and quantitative glaciology pioneered by the Swedish geographer Hans Ahlmann and the complicated history of the Norwegian British Swedish Antarctic Expedition 1949-52 I conclude with an epilogue arguing that the rise of international science in the Antarctic during the 1950s reflected the geopolitical dynamics of the Cold War rather than the triumph of science over politics

Security and Sovereignty in the North Atlantic L. Heininen, 2014-11-21 The North Atlantic continues to be an area of international strategic significance regionally and globally This study explores the strong processes of sovereignty as well as new independent states and micro proto states that are forming in the region

The Routledge Companion to Travel Writing Carl Thompson, 2015-12-22 As many places around the world confront issues of globalization migration and postcoloniality travel writing has become a serious genre of study reflecting some of the greatest concerns of

our time Encompassing forms as diverse as field journals investigative reports guidebooks memoirs comic sketches and lyrical reveries travel writing is now a crucial focus for discussion across many subjects within the humanities and social sciences An ideal starting point for beginners but also offering new perspectives for those familiar with the field The Routledge Companion to Travel Writing examines Key debates within the field including postcolonial studies gender sexuality and visual culture Historical and cultural contexts tracing the evolution of travel writing across time and over cultures Different styles modes and themes of travel writing from pilgrimage to tourism Imagined geographies and the relationship between travel writing and the social ideological and occasionally fictional constructs through which we view the different regions of the world Covering all of the major topics and debates this is an essential overview of the field which will also encourage new and exciting directions for study Contributors Simon Bainbridge Anthony Bale Shobhana Bhattacharji D nlaith Bird Elizabeth A Bohls Wendy Bracewell Kylie Cardell Daniel Carey Janice Cavell Simon Cooke Matthew Day Kate Douglas Justin D Edwards David Farley Charles Forsdick Corinne Fowler Laura E Franey Rune Graulund Justine Greenwood James M Hargett Jennifer Hayward Eva Johanna Holmberg Graham Huggan William Hutton Robin Jarvis Tabish Khair Zo Kinsley Barbara Korte Julia Kuehn Scott Laderman Claire Lindsay Churnjeet Mahn Nabil Matar Steve Mentz Laura Nenzi Aed n N Loingsigh Manfred Pfister Susan L Roberson Paul Smethurst Carl Thompson C W Thompson Margaret Topping Richard White Gregory Woods *Invisible Labour in Modern Science* Jenny Bangham,Xan Chacko,Judith Kaplan,2022-09-01

Invisible Labour in Modern Science is about the people who are concealed eclipsed or anonymised in accounts of scientific research Many scientific workers including translators activists archivists technicians curators and ethics review boards are absent in publications and omitted from stories of discovery Scientific reports are often held to ideals of transparency yet they are the result of careful judgments about what and what not to reveal Professional scientists are often celebrated yet they are expected to uphold principles of objective self denial The emerging and leading scholars writing in this book negotiate such silences and omissions to reveal how invisibilities have shaped twentieth and twenty first century science Invisibility can be unjust it can also be powerful What is invisible to whom and when does this matter How do power structures built on hierarchies of race gender class and nation frame what can be seen And for those observing science When does the recovery of the invisible serve social justice and when does it invade privacy Tackling head on the silences and dilemmas that can haunt historians this book transforms invisibility into a guide for exploring the moral sensibilities and politics of science and its history **Fashioning the Canadian Landscape** John Irvine Little,2018-04-13 Interpretations of

Canada s emerging identity have been largely based on a relatively small corpus of literary writing and landscape paintings overlooking the influence of the British and American travel writers who published hundreds of books and articles that did much to fix the image of Canada in the popular imagination In *Fashioning the Canadian Landscape* J I Little examines how Canada much like the United States came to be identified with its natural landscape Little argues that in contrast to the

American identification with the wilderness sublime however Canada's image was strongly influenced by the picturesque convention favoured by British travel writers This amply illustrated volume includes chapters ranging from Labrador to British Columbia some of which focus on such notable British authors as Rupert Brooke and Rudyard Kipling and others on talented American writers such as Charles Dudley Warner Based not only on the views of the landscape but on the racist descriptions of the Indigenous peoples and the romanticization of the Canadian folk Little argues that the national image that emerged was colonialist as well as colonial in nature

In the Kingdom of Ice Hampton Sides, 2015-05-26 NATIONAL BESTSELLER A white knuckle tale of polar exploration and heroism in the Gilded Age from the New York Times bestselling author of *Blood and Thunder* and *Ghost Soldiers* A splendid book in every way a marvelous nonfiction thriller The Wall Street Journal On July 8 1879 Captain George Washington De Long and his team of thirty two men set sail from San Francisco on the USS *Jeanette* Heading deep into uncharted Arctic waters they carried the aspirations of a young country burning to be the first nation to reach the North Pole Two years into the harrowing voyage the *Jeannette's* hull was breached by an impassable stretch of pack ice forcing the crew to abandon ship amid torrents of rushing water Hours later the ship had sunk below the surface marooning the men a thousand miles north of Siberia where they faced a terrifying march with minimal supplies across the endless ice pack Enduring everything from snow blindness and polar bears to ferocious storms and labyrinths of ice the crew battled madness and starvation as they struggled desperately to survive With thrilling twists and turns *In The Kingdom of Ice* is a spellbinding tale of heroism and determination in the most brutal place on Earth

Ice and Snow in the Cold War Julia Herzberg, Christian Kehrt, Franziska Torma, 2018-10-19 The history of the Cold War has focused overwhelmingly on statecraft and military power an approach that has naturally placed Moscow and Washington center stage Meanwhile regions such as Alaska the polar landscapes and the cold areas of the Soviet periphery have received little attention However such environments were of no small importance during the Cold War in addition to their symbolic significance they also had direct implications for everything from military strategy to natural resource management Through histories of these extremely cold environments this volume makes a novel intervention in Cold War historiography one whose global and transnational approach undermines the simple opposition of East and West

Battle of Ink and Ice Darrell Hartman, 2023-06-06 New York Times Book Review's 100 Notable Books of 2023 Absolutely gripping a perfectly splendid read I highly highly recommend it Douglas Preston author of the 1 New York Times bestseller *The Lost City of the Monkey God* A sixty year saga of frostbite and fake news that follows the no holds barred battle between two legendary explorers to reach the North Pole and the newspapers which stopped at nothing to get and sell the story In the fall of 1909 a pair of bitter contests captured the world's attention The American explorers Robert Peary and Frederick Cook both claimed to have discovered the North Pole sparking a vicious feud that was unprecedented in international scientific and geographic circles At the same time the rivalry between two powerful New York City newspapers the storied *Herald* and the ascendant *Times*

fanned the flames of the so called polar controversy as each paper financially and reputationally committed itself to an opposing explorer and fought desperately to defend him The Herald was owned and edited by James Gordon Bennett Jr an eccentric playboy whose nose for news was matched only by his appetite for debauchery and champagne The Times was published by Adolph Ochs son of Jewish immigrants who d improbably rescued the paper from extinction and turned it into an emerging powerhouse The battle between Cook and Peary would have enormous consequences for both newspapers and help to determine the future of corporate media BATTLE OF INK AND ICE presents a frank portrayal of Arctic explorers brave men who both inspired and deceived the public It also sketches a vivid portrait of the newspapers that funded promoted narrated and often distorted their exploits It recounts a sixty year saga of frostbite and fake news one that culminates with an unjustly overlooked chapter in the origin story of the modern New York Times By turns tragic and absurd BATTLE OF INK AND ICE brims with contemporary relevance touching as it does on themes of class celebrity the ever quickening news cycle and the benefits and pitfalls of an increasingly interconnected world Above all perhaps its cast of characters testifies colorfully and compellingly to the ongoing role of personality and publicity in American cultural life as the Gilded Age gave way to the twentieth century the American century *Finding Franklin* Russell A. Potter,2016-09-01 In 2014 media around the world buzzed with news that an archaeological team from Parks Canada had located and identified the wreck of HMS Erebus the flagship of Sir John Franklin s lost expedition to find the Northwest Passage Finding Franklin outlines the larger story and the cast of detectives from every walk of life that led to the discovery solving one of the Arctic s greatest mysteries In compelling and accessible prose Russell Potter details his decades of work alongside key figures in the era of modern searches for the expedition and elucidates how shared research and ideas have led to a fuller understanding of the Franklin crew s final months Illustrated with numerous images and maps from the last two centuries Finding Franklin recounts the more than fifty searches for traces of his ships and crew and the dedicated often obsessive men and women who embarked on them Potter discusses the crucial role that Inuit oral accounts often cited but rarely understood played in all of these searches and continue to play to this day and offers historical and cultural context to the contemporary debates over the significance of Franklin s achievement While examination of HMS Erebus will undoubtedly reveal further details of this mystery Finding Franklin assembles the stories behind the myth and illuminates what is ultimately a remarkable decades long discovery **The European Antarctic** P. Roberts,2011-12-19 This is the first transnational study of British Norwegian and Swedish engagement with the Antarctic Rather than charting how Europeans unveiled the Antarctic it uses the history of Antarctic activity as a window into the political and cultural worlds of twentieth century Britain and Scandinavia *The Cambridge History of Travel Writing* Nandini Das,Tim Youngs,2019-01-24 Bringing together original contributions from scholars around the world this volume traces the history of travel writing from antiquity to the Internet age It examines travel texts of several national or linguistic traditions introducing readers to the global contexts of the genre From wilderness

to the urban from Nigeria to the polar regions from mountains to rivers and the desert this book explores some of the key places and physical features represented in travel writing Chapters also consider the employment in travel writing of the diary the letter visual images maps and poetry as well as the relationship of travel writing to fiction science translation and tourism Gender based and ecocritical approaches are among those surveyed Together the thirty seven chapters here underline the richness and complexity of this genre A Window to Heaven Patrick Dean,2021-03-02 The captivating and heroic story of Hudson Stuck an Episcopal priest and his team s history making summit of Denali In 1913 four men made a months long journey by dog sled to the base of the tallest mountain in North America Several groups had already tried but failed to reach the top of a mountain whose size occupying 120 square miles of the earth s surface and position as the Earth s northernmost peak of more than 6 000 meters elevation make it one of the world s deadliest mountains Although its height from base to top is actually greater than Everest s it is Denali s weather not altitude that have caused the great majority of fatalities over a hundred since 1903 Denali experiences weather more severe than the North Pole with temperatures of forty below zero and winds that howl at 80 to 100 miles per hour for days at a stretch But in 1913 none of this mattered to Hudson Stuck a fifty year old Episcopal priest Harry Karstens the hardened Alaskan wilderness guide Walter Harper and Robert Tatum both just in their twenties They were all determined to be the first to set foot on top of Denali In A Window to Heaven Patrick Dean brings to life this heart pounding and spellbinding feat of this first ascent and paints a rich portrait of the frontier at the turn of the twentieth century The story of Stuck and his team will lead us through the Texas frontier and Tennessee mountains to an encounter with Jack London at the peak of the Yukon Goldrush We experience Stuck s awe at the rich Aleut and Athabascan indigenous traditions and his efforts to help preserve these ways of life Filled with daring exploration and rich history A Window to Heaven is a brilliant and spellbinding narrative of success against the odds

Handbook on the Politics of Antarctica Klaus Dodds,Alan D. Hemmings,Peder Roberts,2017-01-27 The Antarctic and Southern Ocean are hotspots for contemporary endeavours to oversee the last frontier of the Earth The Handbook on the Politics of Antarctica offers a wide ranging and comprehensive overview of the governance geopolitics international law cultural studies and history of the region Four thematic sections take readers from the earliest human encounters to contemporary resource exploitation and climate change Written by leading experts the Handbook brings together the very best interdisciplinary social science and humanities scholarship on the Antarctic and Southern Ocean Ice humanities Klaus Dodds,Sverker Sörlin,2022-08-02 Ice humanities is a pioneering collection of essays that tackles the existential crisis posed by the planet s diminishing ice reserves By the end of this century we will likely be facing a world where sea ice no longer reliably forms in large areas of the Arctic Ocean where glaciers have not just retreated but disappeared where ice sheets collapse and where permafrost is far from permanent The ramifications of such change are not simply geophysical and biochemical They are societal and cultural and they are about value and loss Where does this change leave our inherited

ideas knowledge and experiences of ice snow frost and frozen ground How will human animal and plant communities superbly adapted to cold and high places cope with less ice or even none at all The ecological services provided by ice are breath taking providing mobility water and food security for hundreds of millions of people around the world often Indigenous and vulnerable communities The stakes could not be higher Drawing on sources ranging from oral testimony to technical scientific expertise this path breaking collection sets out a highly compelling claim for the emerging field of ice humanities convincingly demonstrating that the centrality of ice in human and non human life is now impossible to ignore

The Gates of Hell Andrew D. Lambert, 2014-05-14 From one of our foremost naval historians the compelling story of the doomed Arctic voyage of the HMS Erebus and the HMS Terror commanded by Captain Sir John Franklin Andrew Lambert a leading authority on naval history reexamines the life of Sir John Franklin and his final doomed Arctic voyage Franklin was a man of his time fascinated even obsessed with the need to explore the world he had already mapped nearly two thirds of the northern coastline of North America when he undertook his third Arctic voyage in 1845 at the age of fifty nine His two ships were fitted with the latest equipment steam engines enabled them to navigate the pack ice and he and his crew had a three year supply of preserved and tinned food and more than one thousand books Despite these preparations the voyage ended in catastrophe the ships became imprisoned in the ice and the men were wracked by disease and ultimately wiped out by hypothermia scurvy and cannibalism Franklin s mission was ostensibly to find the elusive North West Passage a viable sea route between Europe and Asia reputed to lie north of the American continent Lambert shows for the first time that there were other scientific goals for the voyage and that the disaster can only be understood by reconsidering the original objectives of the mission Franklin commonly dismissed as a bumbling fool emerges as a more important and impressive figure in fact a hero of navigational science

Higher and Colder Vanessa Heggie, 2019-08-02 During the long twentieth century explorers went in unprecedented numbers to the hottest coldest and highest points on the globe Taking us from the Himalaya to Antarctica and beyond *Higher and Colder* presents the first history of extreme physiology the study of the human body at its physical limits Each chapter explores a seminal question in the history of science while also showing how the apparently exotic locations and experiments contributed to broader political and social shifts in twentieth century scientific thinking Unlike most books on modern biomedicine *Higher and Colder* focuses on fieldwork expeditions and exploration and in doing so provides a welcome alternative to laboratory dominated accounts of the history of modern life sciences Though centered on male dominated practices science and exploration it recovers the stories of women s contributions that were sometimes accidentally and sometimes deliberately erased Engaging and provocative this book is a history of the scientists and physiologists who face challenges that are physically demanding frequently dangerous and sometimes fatal in the interest of advancing modern science and pushing the boundaries of human ability
