The Container Case:

Learning to be Norwegian. A case study of identity management in religious education in Norway Lars Laird Iversen, 2012 How are people educated to feel that they are part of a nation What role does religion play in such a process In this book Lars Laird Iversen takes a close look at Religious Education in Norway in order to find answers to these crucial questions The intersection of school religion and national identity is a hotspot for public controversy in Norway as well as many other countries Global flows of ideas and migrants have made religious plurality a fact on the ground in Norwegian city and mediascapes Iversen investigates the complexities that arise when the nation shaping ambitions of Norwegian state curriculum authors meets the diverse group of pupils in religious education classes The book also provides a theoretical discussion on how religious groups and other groups with identity claims should be understood drawing on contemporary debates between social constructionist and critical realist approaches

Next Generation CASE Tools Kalle Lyytinen, V.-P. Barbosa-Canovas,2014-04-10 Consumer expectations are systematically growing with demands for foods with a number of attributes which are sometimes difficult for manufacturers to meet The engineering processes that are needed to obtain top quality foods are a major challenge due to the diversity of raw materials intermediates and final products As in any other enterpris *Sustainable Solid Waste Collection and Management* Ana Pires,Graça Martinho,Susana Rodrigues,Maria Isabel Gomes,2018-09-20 This volume focuses on the collection of waste and waste streams as an integral aspect of sustainable waste management The authors take economic models and behavioral studies into account to go beyond just descriptions of waste collections technologies and collection route design Models and tools for sustainable waste collection are described in detail and the authors provide a comprehensive integrated methodology to design waste collection systems that reduce environmental impacts are economically viable and achieve buy in and participation from target populations Part I of the book provides fundamentals and context on waste hierarchy including waste prevention reduction and reuse waste collection itself and steps such as preparation for recycling recycling treatment and landfilling Background in environmental social and economic concerns surrounding waste collection is also provided here Part II addresses tools for design operation and maintenance of waste collection systems Part III focuses on how the tools presented in Part II can be used to support sustainability assessments and decisions that consider the entire life cycle of waste and the role of waste collection programs in waste prevention reduction reuse recycling treatment and disposal Part IV addresses the challenges of developing sustainable waste management systems and addresses the role of waste collection in sustainable waste management in the future *Advances in Reflectometric Sensing for Industrial Applications* Andrea Cataldo,Egidio De Benedetto,Giuseppe Cannazza,2022-05-31 This book offers a comprehensive review of innovative measurement and monitoring solutions based on time domain reflectometry TDR This technique has numerous applications in several fields ranging from the characterization of electronic devices to quality control of vegetable oils However most of the well established TDR based monitoring solutions rely on local or punctual probes therefore typically to monitor large areas volumes a high number of probes must be employed with the consequent maintenance and management requirements

On such bases in the last few years the authors have carried out extensive research on the use of diffused wire like sensing elements to be used as probes for TDR measurements The basic idea has been to extend the principles of punctual TDR based monitoring to multi purpose networks of diffused sensing elements SE s embedded permanently within the systems to be monitored STBM s These SEs can be tens of meters long and can follow any desired path inside the STBM in fact they are inactive inside the STBM Additionally these SE s are passive i e they do not require batteries and their sensing ability is activated by the TDR signal when they are connected to the measurement instrument In addition to this these SE s are completely maintenance free Starting from these considerations this book addresses the use of low cost passive flexible wire like SE s to be used in conjunction with TDR This book also provides several application test cases with hints for practical implementation of the described monitoring systems
