Africa's Underdevelopment: The Nigerian Predicament Adeniyi A. Adebisi, 2024-09-24 For the past 50 years and I am now in my mid 80s I have been inundated with questions that I never seem to have answers to The questions have come from the young and the old educated and the uneducated academicians politicians public affairs analysts and men and women of all races Worst still when people at all levels make any efforts to offer any explanations their explanations often stop at reiterating the same questions not bothering to reason out of the box thereby deepening the factors that have bedeviled Africa and the black race The efforts never go beyond discussing the issues while the causes and the way forward often remain untouched The COVID 19 period was the period I found myself severely restricted as I had never experienced before For the reason I can not remember now I challenged myself to address the myriad of questions aforesaid and proffer a way forward from my little corner In 1776 Adam Smith s Magnum Opus The Wealth of Nations made its debut in England There were similar literary works that broke out at the same time in Europe especially in France The general theme of the various works was that men human beings should be allowed to follow their self interest as might be directed by some invisible hand without any

hindrance from the government of the day If this was allowed individuals would be fulfilled or satisfied and nations would be wealthy How did this play out Europeans swooped on Africa to pursue their self interests backed by their cabal controlled governments The European cabals and their foot soldiers were immensely successful and their countries became rich and are still rich but all are for vanity and personal aggrandizement It was the slave trade at first and after that came the ruthless exploitations of human and material resources of the African continent its citizens and the black race This has been the case these past seven centuries and it remains so up till today I discovered too that these mischievous nations and individuals devised how things will remain the same forever They are ruling African countries directly and by proxy They recruited and are still recruiting their intermediaries who we call our leaders to rule us on their behalf African leaders from the presidents to the lowest in the leadership hierarchy are nothing more than intermediaries created and nurtured by their past colonial masters who are always looming like a shadow behind them What is the way forward Possession is said to be a greater part of ownership Africa must rise to own their possession Africa and the blacks are the first and the best Africa and blacks all over the world should turn the tables against the nations that are riding high simply by the application of barbaric force wicked manipulation of people religious bigotry and worthless subterfuges They will not change on their own as nobody changes a winning card Africa must rise up therefore to possess their possession

Economic, Political and Legal Solutions to Critical Issues in Urban Education and Implications for Teacher Preparation

Stephanie Thomas,Shanique J. Lee,Chance W. Lewis,2022-06-01 The Montgomery bus boycott Student Nonviolent
Coordinating Committee SNCC and Brown v Board of Education reveal incentives to reform as a result of economic political
and legal threat It is difficult to change a person s heart or to change based on moral conviction alone However policies and
laws can be established that will change a person s behavior Historically there was rarely a time where societal changes
were the result of a desire to do what was morally right Doing what is right was contingent upon economic advantages
political motivation or the threat of litigation By the mid 1900s the NAACP had learned a valuable lesson in the South that
litigation or the threat of litigation was an effective tool in the quest for educational equality Douglas 1995 More recently the
metoo movement and the Los Angeles teacher s strike exposed corrupt behavior and insufficient working environments that
have existed for decades What is different They have been exposed through political economic and legal means As it pertains
to educating African Americans there was an ongoing role of servitude in the political economy of the South Anderson 1988
This was subsequently disrupted through political economic and legal measures during Reconstruction Racist ideologies and
economic advantages were seen through Jim Crow Laws Roback 1984 that were again disrupted through political economic
and legal methods Education has also been cited as what perpetuates our democracy It is institutions that afford its citizens
the skills and knowledge necessary for political participation Rury 2002 Even when legal cases are unsuccessful such as Puitt
v Commissioners of Gaston County or Plessy v Ferguson they can forge the way to successful litigation dismantling racist
ideologies that oppress African Americans Although the Puitt decision did not remove the processes of discrimination against

Black schools it left intact the legal basis on segregated and unequal education Douglas 1995 As citizens it is imperative that we participate in the political process and use our authority to mandate the changes we would like to see in urban education When theorizing this book the intent was to provide an interdisciplinary look at solutions to critical issues in urban education through political economic and legal avenues This book seeks to provide an interdisciplinary approach to solving the issues in education while connecting it to the effects on teacher preparation Using historical and recent examples scholars can piece together solutions that will guide others to political economic and legal action necessary to dismantle systems that have bound Black and Brown children It is our intent to offer innovative yet grounded solutions that can purposefully move the conversation about solutions to critical issues in education to political economic and legal actions

Illicit Financial Flows from South Africa Serges Djoyou Kamga, 2021-09-21 This book examines the detrimental impact of illicit financial flows on South Africa's development political economy and transformation in the 21st century Over the years illicit financial flows have led to the systematic looting and channelling away of South African resources yet they are rarely studied by researchers looking to explain the country's underdevelopment and political economy This book looks across sectors showing that illicit financial flows cut across all the key pillars of development frustrating the betterment of people's lives in South Africa Investigating the problem from a decolonial perspective the book delves deep into the catastrophic impacts of illicit financial flows for people and the economy discusses how the problem is being combatted and ultimately suggests solutions for rebuilding social trust between people and the state Making an important contribution to the decolonial debate as well as to discussions of South Africa's political economy this book will be of interest to researchers across African studies global development political science law and corruption studies

Prospects for Regional Integration in Africa Andreas Freytag, Abena D. Oduro, African integration has had a long history dating back to the end of colonization in the 1960s It has generated enormous interest in recent years not least because the continent has recently taken some bold steps to integrate further such as the Tripartite Free Trade Area or the creation of the African Continental Free Trade Area AfCFTA With this book we offer an innovative perspective on African integration By inviting mostly young African scholars from different disciplines in the social sciences and humanities we make African voices audible and start a discussion of the African integration efforts from an African perspective using novel criteria to judge different African integration attempts In addition to the younger generation's representatives we also invited scholars from Europe and Latin America to bring other continents' perspectives to the fore
