Transformation of Archives and Heritage Education in Post-apartheid South Africa Geraldine Frieslaar,Olusegun Morakinyo,2023-06-10 Although there have been significant strides

to transform the demographics of archive and museum personnel develop new museums and heritage institutions and heritage training initiatives in post apartheid South Africa the Eurocentric model of the archive museum and heritage sector has largely remained intact Despite the euphoria around the transformation of heritage in the beginnings of post apartheid South Africa it can be argued that the transformation of heritage institutions has been superficial and cosmetic with the ideological foundation of the colonial archive and museum as well as Eurocentric modalities of heritage education remaining solid largely unmoved and under continuing challenge This is the thrust of this book which reflects on the transformation of archives and museum and heritage education in South Africa and argues for meaningful transformation of the sector through a decolonisation from its Eurocentric mooring

Schooling for Sustainable Development in

Africa Heila Lotz-Sisitka, Overson Shumba, Justin Lupele, Di Wilmot, 2016-11-11 This book considers the scope and dynamics of Education for Sustainable Development ESD and learning in schools in Africa It explores the conditions and processes that support such learning and examines how ESD in schooling can improve the quality and relevance of education The quality of education has been defined internationally as a key concern for educational institutions around the world including schools in Africa The models of quality are often limited to performance based approaches and or inclusive approaches The contributions in this book show that there is more to a discussion on educational quality in Africa than performance success and or inclusion The chapters explain how ESD brings a new relevance to education in Africa and at the same time sounds the beginning of a new concept of quality education The volume presents a collection of experiences in creating and supporting quality learning processes through a variety of ESD practices Rethinking South Africa's Past Christopher J. Lee, Andrew Offenburger, 2025-03-18 This book presents key historical scholarship published in *Safundi* from 1999 to 2024 tracing South Africa's past through approaches of comparative history transnational history and visual history in addition to addressing the importance of topics like gender labor and class dynamics as well as regional historiographies The first section of the book focuses on comparative history as a founding method for *Safundi* given the journal's origins in American and South African studies while also recalibrating this approach through a variety of topics cities biographies and practices of violence rather than nation states writ large Drawing upon innovative sources of evidence the second section moves beyond the comparative method to address transnational histories as a new narrative technique for storytelling and analysis Whether issues of education immigration or visiting musicians to South Africa these chapters demonstrate the importance of a post national approach for understanding the past The sections that follow fan out into other subject areas including the uses of visual history gender roles class cultures and environmental history all of which illuminate connections between South African history and other parts of the world This book will be an indispensable resource for scholars students activists and policymakers as well as those readers who are generally interested in understanding South Africa's complex history over the past several centuries **Activity Theory, Authentic Learning and Emerging Technologies** Vivienne Bozalek, Dick Ng'ambi, Denise Wood, Jan Herrington, Joanne Hardman, Alan Amory, 2014-09-15 Although emerging technologies are becoming popularised for teaching learning and research the relationship between their use and transformative effects on higher education remain largely unexplored This edited collection seeks to fill this gap by providing a nuanced view locating higher education pedagogical practices at an intersection of emerging technologies authentic learning and activity systems Providing numerous case studies as examples the book draws from a wide range of contexts to illustrate how such a convergence has the potential to track transformative teaching and learning practices in the higher education sector Chapters provide the reader with a variety of transformative higher education pedagogical practices in southern contexts theorised within the framework of Cultural Historical Activity Theory CHAT and tool mediation while using authentic

learning as a pedagogical model upon which this theoretical framework is based The topics covered in the book have global relevance with research paying particular attention to South Africa Australia and New Zealand where the authors are based The book will be of interest to educators researchers and practitioners in higher education as well as those interested in emerging technologies in education more generally The African Past and Contemporary Culture Gesellschaft für die Neuen Englischsprachigen Literaturen.
