After You Say Hello? Eric Berne, 1972 As a psychiatrist Dr Berne found that each person in early childhood under the powerful influence of his parents writes his own script that will determine the general course of his life That script dictates what kind of person he will marry how many children he will have even what kind of bed he will die in Most of all it determines whether he will be a winner or a loser a spendthrift or a skinflint a tower of strength or a doomed alcoholic Some people says Berne have scripts that call for them to fail in their professions or to be repeatedly disappointed in love or to be chronic invalids Here he demonstrates how each life script gets written how it works and how each of us can break free of it to help us attain real autonomy and true fulfillment From publisher description *A Living History of Transactional Analysis Psychotherapy* Steff Oates, Diana Deaconu, 2025-03-31 This important book offers a comprehensive review of over 70 years of transactional analysis psychotherapy from within the field considering its historical context and various applications as well as how different aspects of the theory emerged and how they are applied The book examines the structure of transactional analysis taking readers on a journey from the inception of the method to present day applications of the theory The authors raise questions around the way the theory may be taught as doctrine and ask readers to consider how new aspects of theory are fully integrated into the already existing schema The authors also highlight the zeitgeist within which TA was developed and offer reflections as to how further developments are also part of a particular spirit and mood of the times in which they were developed A Living History of Transactional Analysis Psychotherapy offers coherence between different aspects of TA
