Transnationalism and Translation in Modern Chinese, English, French and Japanese Literatures Ryan Johnson, 2020-12-15 The theory of literary worlds has become increasingly important in comparative and world literatures But how are the often contradictory elements of Eastern and Western literatures to cohere in the new worlds such contact creates Drawing on the latest work in philosophical logic and analytic Asian philosophy this monograph proposes a new model of literary worlds that is best suited to comparative literature dealing with Western and East Asian traditions Unlike much discussion of world literature anchored in North American traditions featured here is the transnational work of artists philosophers and poets writing in English French Japanese and Mandarin in the twentieth century Rather than imposing

sharp borders this book suggests that vague boundaries link Eastern and Western literary works and traditions and that degrees of distance can better help us to see the multiple dimensions that both distinguish and join together literary worlds East and West As such it enables us to grasp not only how East Asian and Western writers translate one another's works into their own languages and traditions but also how modern writers East and West modify their own traditions in order to make them fit in the new constellation of literary worlds brought about by the complex flow of literary information across twentieth century Eurasia

Rock Poetry in Post-Dictatorship Argentina Lucas R. Berone, 2024-06-10 This book is a historical and discursive study of rock poetry produced in Argentina during the transition to democracy in the 1980s Lucas R Berone analyzes the lyrics and albums of a heterogeneous group of Argentine rock artists and bands who began their careers at that time to demonstrate the emergence and functioning of a new grammar of discursive production he terms the grammar of the incognitus or hidden subject This grammar is a very specific and distinct way of elaborating the enunciative relationship between the artist and his audience when compared to the traditional countercultural rock discourse The author asserts that the new discursive grammar focused on the singularity of the present and the self will produce the last important revolution in the tradition of the so called rock nacional motivating critical responses in the leaders of the movement
