Behary's Disarming the Narcissist Third Edition Everest Media, 2022-05-28T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The narcissist both appeals and appalls He may look like a modern day Sir Lancelot replete with the most swaggering charm but he is also a master of illusion His arrogance condescension and lack of empathy lead to frustrating interpersonal encounters and chronically difficult long term relationships 2 The majority of narcissists are male so I'll primarily use the male pronoun and male examples throughout this book However at the end of this chapter you'll find material on particularities of female narcissists 3 If you checked at least ten of the thirteen items on the list the person in your life most likely meets the criteria for overt maladaptive narcissism the most common and difficult form This type of narcissist is in your face and unwieldy 4 The term narcissism is derived from Greek mythology's tale of Narcissus who was doomed to eternally fall in love with his own image in a mountain pool as punishment for refusing to accept an offer of love from Echo a young mountain nymph Summary of Michelle Skeen & Wendy T. Behary's Love Me, Don't Leave Me Everest Media, 2022-03-08T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 If you are afraid of being abandoned you may be trapped in a fear and its accompanying behaviors You may be attracted to people who are critical inconsistent or abusive and you may find yourself engaged in hurtful behaviors 2 Your fear of abandonment is the result of factors that were present at your birth and in your environment These are conditions you couldn't control as a child Now you feel that the beliefs that formed as a result of these factors are controlling you 3 A securely attached child is

comforted by their caregiver when they are distressed and they feel safe and secure with them They are excited when their caregiver returns after a period of time apart and they are accepting of and comforted by their caregiver's embrace 4 The avoidantly attached child experiences a primary caregiver who is rejecting and at times harsh As a result the child depends less on her caregiver as a secure base The child is at times aggressive toward her caregiver and the child shows no interest in her caregiver when she returns
