The coverage of politics reflects the social mediation of everyday life where individual experiences and thoughts are documented and shared online. In *Social Media and Everyday Politics*, Tim Highfield examines political talk as everyday occurrences on Twitter, Facebook, blogs, Tumblr, Instagram and more. He considers the personal and the political, the serious and the silly, and the everyday within the extraordinary as politics arises from seemingly banal and irreverent topics. The analysis features international examples and evolving practices from French blogs to Vines from Australia via the Arab Spring, Occupy, *Jesu is Charlie*, Eurovision, Black Lives Matter, *Everyday Sexism* and *illridewithyou*. Focus On: 100 Most Popular American Stage Actresses Wikipedia contributors, **Retaking Rationality** Richard L. Revesz, Michael A. Livermore, 2008-04-16 That America's natural environment has been degraded and despoiled over the past 25 years is beyond dispute Nor has there been any shortage of reasons why short sighted politicians a society built on over consumption and the dramatic weakening of environmental regulations In *Retaking Rationality* Richard L. Revesz and Michael A. Livermore argue convincingly that one of the least understood and most important causes of our failure to protect the environment has been a misguided rejection of reason The authors show that environmentalists labor unions and other progressive groups have declined to participate in the key governmental proceedings concerning the cost benefit analysis of federal regulations As a result of this vacuum industry groups have captured cost benefit analysis and used it to further their anti regulatory ends Beginning in 1981 the federal Office of Management and Budget and the federal courts have used cost benefit analysis extensively to determine which environmental health and safety regulations are approved and which are sent back to the drawing board The resulting imbalance in political participation has profoundly affected the nation's regulatory and legal landscape But Revesz and Livermore contend that economic analysis of regulations is necessary and that it needn't conflict with and can in fact support a more compassionate approach to environmental policy Indeed they show that we cannot give up on rationality if we truly want to protect our natural environment *Retaking Rationality* makes clear that by embracing and reforming cost benefit analysis and by joining reason and compassion progressive groups can help enact strong environmental and public health regulation
