

The background of the book cover is a high-magnification, false-color scanning electron micrograph of a microchip die. The die is rectangular and densely packed with intricate circuit patterns. Various regions are highlighted in different colors: bright green for some functional blocks, deep red for others, and a large blue/purple area in the lower-left corner, likely representing a memory array. Fine, light-colored lines crisscross the surface, representing the interconnects or bond wires.
