

Year 1	Western Adelaide Region - Maths Assessment Tasks Map (Draft – November 2013)					Pedagogical Goals	
Overview	The Australian Curriculum: Mathematics aims to ensure that students... are confident, creative users and communicators of mathematics, able to investigate, represent and interpret mathematical problems and work both within and across mathematics, develop an increasingly sophisticated understanding of mathematical concepts and fluency with processes, and are able to pose and solve problems and reason in Number and Algebra, Measurement and Geometry, and Statistics and Probability; recognise connections between the areas of mathematics and other disciplines and appreciate mathematics as an accessible and enjoyable discipline to study.					• Understanding • Fluency • Problem Solving • Reasoning	
Content Strands	Number & Algebra						
Sub Strands	Number: 1 Place Value			Fractions and Decimals	Money and Financial Mathematics	Patterns & Algebra	
Big Idea 1 Concept Key Understanding	Counting the Count		Place Value	Addition Multiplication Thinking	Partitioning		
	Numbers are said in a particular order and there are patterns in the way we say them The teacher will model this using many or few rods A place value chart shows many tens and what it looks like (see Sample 1, Sample 2, Sample 3, Sample 4) We can recognise small collections without counting (subitising) Collections can be measured, compared and classified as more, less, equal to... or between 2 and 10 (smaller, different)	In place value we use units (tens, hundreds, thousands) In place value there are names for thousand units (multiples of 10) (tens, hundreds, thousands)	Numbers can be named in terms of their parts (part part whole, T10 and 2, Tens 1, 4 and 3...) Numbers have properties that help us work flexibly with them (eg. T10 and 2, 5 and 10, 1 and 10, 1 and 10) Partitioning and comparing numbers is essential for mental and written calculation	The number of parts names the part (e.g. 2 parts = half, 1 part = whole) True fractions have equal parts Language is important (e.g. 7 less 1 not 2, 2 apples, then half – how many not half each)	Currency has defined values and can be recognised and sorted according to appearance and value The size of Australian coins and notes does not determine its value Each country has its own currency Currency makes sense in food and services	A pattern requires an element of repetition that can be described and generalised with symbols Patterns can be represented in many ways including using combinations of numbers, objects and symbols Patterns are all around us	
Assessment Content Description	Counting combinations with number sequences to and from 100 by ones from any starting point. Skip count by 2s, 5s and 10s starting from zero	Recognise, model, read) write and order numbers to at least 100. Locate these numbers on a number line	Count collections to 100 by partitioning numbers using place value	Represent and solve simple addition and subtraction problems using a range of strategies including counting on, partitioning and measuring parts	Recognise and describe half as one of two equal parts of a whole	Recognise, describe and order Australian coins according to their value	Investigate and describe number patterns formed by skip counting and counting with objects
Assessment Standard	Students describe number sequences counting from skip counting by 2s, 5s and 10s	Students read and write from 100 and locate numbers on a number line	Students partition numbers using place value	Students carry out simple additions and subtractions using counting strategies	Students identify representations of one half	Students recognise Australian coins according to their value	Students describe simple patterns involving numbers and objects
Assessment Assessment Task	1.1 Number Chains		1.2 Mystery Number	1.3 On the Bus		1.4 Lucy's Books
