By 1847, nearly the entire United States was owned by the U.S. government. The last piece of land was acquired in 1848 when the U.S. took over the remaining land in the New Mexico Territory after the Mexican American War.

Once the land acquisitions were complete, the United States government had to encourage settlers to move into the frontier territories. Cities were overcrowded, and there was no room for more people. Many people were afraid to move out west. Citizens were not sure if they would be able to make the journey and start new lives in uncharted territory.

To get people to move, the U.S. government passed the Homestead Act. This act granted free land to any citizen willing to move out west and farm the land for five years. The act allowed only people to build homes and own property when they had never had that option before.

The Knowledge Gap Natalie Wexler,2020-08-04 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America s education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country s frustrating lack of progress when it comes to providing every child with a quality education The problem wasn t one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum s intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff s *The Prize* and Dana Goldstein s *The Teacher Wars* Wexler

brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But The Knowledge Gap isn't just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention
