**The Oxford Handbook of European Union Law** Anthony Arnall, Damian Chalmers, 2015 Since its formation the European Union has expanded beyond all expectations this seems set to continue as more countries seek accession and the scope of EU law expands touching more and more aspects of its citizens lives The EU has never been stronger and yet it now appears to be reaching a crisis point beset on all sides by conflict and challenges to its legitimacy Nationalist sentiment is on the rise and the Eurozone crisis has had a deep and lasting impact The European Union has the complexity and depth of a mature legal system albeit one which is constantly in flux and whose content and foundations are constantly contested Its law has developed beyond the single market and institutional matters into many other fields including environmental fiscal labour immigration and criminal law It is studied at undergraduate and postgraduate level throughout the Member States and beyond an understanding of it is essential to those who study the EU from other disciplinary perspectives as well as to legal practitioners and policy makers The Oxford Handbook of European Union Law comprises eight sections examining how we are to conceptualise EU law the architecture of EU law making and administering EU law the economic constitution and the citizen regulation of the market place economic monetary and fiscal union the Area of Freedom Security and Justice and what lies beyond the regulatory state Each chapter summarises analyses and reflects on the state of play in a given area and suggests how it is likely to develop in the foreseeable future The resulting collection provides a vivid and provocative tapestry which will be widely used both inside and outside academia by those who

are interested in the law underpinning the EU and its policies

**Environmental Integration in Competition and Free-Movement Laws** Julian Nowag, 2016-11-10 Environmental Integration in Competition and Free Movement Laws engages in a comprehensive analysis of the obligation of Article 11 TFEU integration of environmental protection requirements in the three core areas of EU internal market law competition state aid and free movement It develops a theoretical framework for integrating environmental and other policies and compares how environmental integration takes place within competition state aid and free movement law In turn it paves a way for a more transparent and consistent integration of environment protection in these three core areas of law Structured in three parts this volume I offers a detailed analysis of the historical development of environmental integration including discussions of the various intergovernmental conferences which led to a number of Treaty changes shaping the obligation itself II It investigates which provisions and concepts within competition law state aid law and the market freedoms can be interpreted in order to provide a clear demarcation of environmental protection and these areas of law III It analyses how competition state aid and free movement law allow for a balancing of the environment against restrictions in cases of conflict

Constitutional Disintegration and Disruption Oliver Garner, 2025-04-02 The United Kingdom's unprecedented withdrawal from the European Union in 2020 may be regarded as the first example of European disintegration This moment however was preceded by decades of disruption as the UK Ireland and Denmark pursued opt outs from the supranational constitutional order Constitutional Disintegration and Disruption Withdrawal and Opt Outs from the European Union provides the first comprehensive analysis of these two phenomena The book presents the European Union as an order that is legitimated by individuals playing a dual role as both nationals of Member States and citizens of the European Union in turn individuals are both democratic subjects and juridical objects within this order The EU Treaties have instituted a triptych for the exercise of constituted constituent power by these individuals Article 49 TEU allowing accession Article 48 TEU enabling amendment and Article 50 TEU as a mechanism for the repatriation of power through withdrawal Opt outs are an iterative anomaly that have arisen through the retention of amendment power by representatives of Member State nationals Reservations of constituent power have been operationalized in Protocols to the Treaties By contrast the withdrawal clause was proactively inserted into the Treaties as a sovereign right for Member State nationals subject to an orderly supranational procedure for the benefit of all EU citizens The book presents narratives of disruption and disintegration that provide comprehensive historical overviews of how opt outs and withdrawal arose and developed Constitutional Disintegration and Disruption concludes with criticism of the consequences of these phenomena for individuals and proposes reforms to the EU Treaties that would enable citizens to more fully realize their dual role in the European constitutional space

Constitutional Evolution in Central and Eastern Europe Alexander H.E. Morawa, 2016-12-14 This book examines EU enlargement by studying how domestic constitutional evolution in the new member states contributes to European integration In contrast to

the usual top down analytical pattern it reverses the paradigm by looking at constitutional developments and dynamics from the bottom up studying how domestic constitutional evolution contributes to European integration The authors analyze constitutional trends from the perspective of new Member States as policy makers and not strictly as policy takers The issue of conditionality is also explored in a discussion of the extent to which pre 2004 and 2007 conditionality has had lasting effects at the level of constitutionalization of different areas and norms and if so of what kind The exploration of Europeanization effects in recent Member States substantiates and demonstrates how enlargement has been an important driving force for the effective export of EU legal rules in this region The book utilizes a comparative approach to highlight the merits and obstacles created by the growing diversity in the constitutional rules and patterns of the new Member States It also contains a section that places the CEE constitutionalizing map in a broader comparative European and global context establishing links with similar transitional regimes in the continent and elsewhere

**Criminality at Work** Alan Bogg,Jennifer Collins,Mark Freedland,Jonathan Herring,2020-03-12 From the Master and Servant legislation to the Factories Acts of the 19th century the criminal law has always had a vital yet normatively complex role in the regulation of work relations Even in its earliest forms it operated both as a tool to repress collective organizations and enforce labour discipline while policing the worst excesses of industrial capitalism Recently governments have begun to rediscover criminal law as a regulatory tool in a diverse set of areas related to labour law modern slavery penalizing irregular migrants licensing regimes for labour market intermediaries wage theft supporting the enforcement of general labour standards new forms of hybrid preventive orders harassment at work and industrial protest This volume explores the political and regulatory dimensions of the new criminality at work from a wide range of disciplinary perspectives including labour law immigration law and health and safety regulations The volume provides an overview of the regulatory terrain of criminality at work exploring whether these different regulatory interventions represent politically legitimate uses of the criminal law The book also examines whether these recent interventions constitute a new pattern of criminalization that operates in preventive

mode and is based upon character and risk based forms of culpability The volume concludes by reflecting upon the general themes of criminality at work comparatively from Australian Canadian and US perspectives Criminality at Work is a timely rich and ambitious piece of scholarship that examines the many intersections between criminal law and work relations from a historical and contemporary vantage point **Comparative Labor Law & Policy Journal**, 2007 *Education and Training Politics in Europe* Philipp Assinger, 2020-09-11 In the past seventy years education and training have evolved from side issues of political cooperation to political priorities of the EU For three decades within this period they were promoted implicitly to enable the mobility of workers in the internal market Later on a European dimension of education and training has developed through mobility and cooperation programs and through the lifelong learning discourse Today a European policy space of education and training is unfolding which the EU is coordinating by the means of soft governance arrangements A Union of Peoples Pavlos Eleftheriadis, 2020 This book delves into the legal theory of the European Union offering an internationalist theory of European Union law as part of the law of nations where its central principles are not the principles of a single constitution but the cosmopolitan principles of accountability liberty and fairness **Research Handbook on Legal Aspects of Brexit** Adam Łazowski, Adam Cygan, 2022-11-18 Illustrating the legacy of Brexit this timely Research Handbook provides a comprehensive and coherent analysis of not only the Brexit process within the UK but also what it means for both the UK and the EU within the framework of their future relationship **Implementing European Union Education and Training Policy** D. Phillips, H. Ertl, 2007-05-08 The papers which make up this volume have for the most part emerged from the work of a team of young researchers based for varying periods at the Department of Educational Studies of the University of Oxford as part of an international network funded by the European Union The network known as PRESTiGE Problems of Educational Standardisation and Transition in a Global Environment involves teams at six European universities each of which can only employ young researchers from Member States other than that in which it is situated The Oxford part of PRESTiGE has been concerned with the interpretation transmission and implementation of European Union education and training policy in four Member States France Germany Sweden and the United Kingdom As the leader of the Oxford team I had the good fortune to work with young researchers from Denmark Germany Greece Sweden and Portugal Their work is included here So too are contributions from Jake Murdoch a member of the Dijon team based at the Universit de Bourgogne and Professor Ant nio N voa the leader of the Lisbon team Together the papers which we have allowed to overlap to some extent so that each one can be read independently represent a genuinely international collaborative effort to understand the intentions and the effects of EU education and training policy and we hope that they will contribute to further discussion of the important issues that those with an interest in European co operation and development will wish to pursue Intersectional Discrimination Shreya Atrey, 2019-09-19 This book examines the concept of intersectional discrimination and why it has been difficult for jurisdictions around the world to redress it in discrimination law Intersectionality was coined

by Kimberl Crenshaw in 1989 Thirty years since its conception the term has become a buzzword in sociology anthropology feminist studies psychology literature and politics But it remains marginal in the discourse of discrimination law where it was first conceived Traversing its long and rich history of development the book explains what intersectionality is as a theory and as a category of discrimination It then explains what it takes for discrimination law to be reimagined from the perspective of intersectionality in reference to comparative laws in the US UK South Africa Canada India and the jurisprudence of the European Courts CJEU and ECtHR and international human rights treaty bodies
