

LASER Nd-YAG

Capítulo 1: Principios y parámetros

1. 1 Principio de tratamiento

Esta Máquina láser utiliza el Q-Mode. Uso de láser por destrucción de alta potencia enfocado en la base del pigmento. Es decir, el principio de la fotovolidadura: el uso de láser instantáneo de alta energía permite que las partículas absorban energía después de la explosión del pigmento. Como parte de la fusión de partículas estas se reabsorbe por el cuerpo, eliminando los pigmentos por el sistema linfático, manteniendo así la integridad del marco celular, evitando la formación de cicatrices.

El láser disipa el pigmento sin destruir el tejido normal. Por lo tanto, tiene el máximo grado de seguridad para garantizar que los clientes no estén sujetos a complicaciones

Yag 2500 Laser Manual
