****Note:** some things had charts so I put them in instead of typing it all out, some things are common sense (i.e. how to communicate with non-verbal pts. Also page numbers are based on the pdf format of the book not the actual hard copy so they may be a couple pages off but they are close)

1. Identify the reason for the use of accessory muscles for breathing.

- o Google → Assist the primary muscles when the chest is not expanding or contracting effectively to meet ventilation demands.
- o Also Google → Increased age, stress, poor posture, COPD, pneumonia, & illness are conditions that negatively impact proper O₂/CO₂ exchange in the lungs
- o From book (pg. 1402) → Contraction & relaxation of chest muscles (& the diaphragm) cause changes in size & pressure of the chest cavity. At times, back & abdominal muscles are used in addition to chest muscles when work of breathing is increased.
- o Old Health ppt → Occur as a result of forced inspiration, as with intense exercise or respiratory distress

2. What will the nurse see upon physical assessment if a patient is using accessory muscles to breathe? (from an old health ppt)

- o Includes use of the muscles of the neck, shoulders, & abdomen.
- o Sternal & intercostal retraction
- o In distress, the abdominal muscles contract to push the diaphragm upward, squeezing the lungs
- o Neck & shoulder muscles used to assist breathing, muscles between the ribs pull during inspiration
- o Possible etiology → COPD, asthma in exacerbation, secretion retention, respiratory distress & hypoxemia
- o From Book (pg. 1426) → Front-to-back (AP) diameter ratio is usually 1:1.5, depending on body build. It increases to 1:1 in pts. w/ emphysema (barrel-chest)

3. Many changes occur in the respiratory system as a person ages. What impact do these changes have on the function of the respiratory system of an Older Adult? What are key interventions to promote health in this population related to the respiratory system? (also on pg. 1408-1411- I didn't feel like typing it out so here's a chart)
