Rebel Streets and the Informal Economy Alison Brown, 2017-02-24 Street trade is a critical and highly visible component of the informal economy linked to global systems of exchange Yet policy responses are dismissive and evictions commonplace Despite being progressively marginalised from public space street traders in the global south are engaged in spatial and political battlegrounds to reclaim space and claim de facto property rights over their place of work through quiet infiltration union power or direct action This book explores rebel streets the challenges faced by informal economy actors and how organised groups are seeking to reframe legal understandings to create new claims to space and urban rights The book sets out new thinking and a conceptual framework for improved understanding of the plural relationship between law rights and space for the informal economy the contest between traditional modernist and rights based approaches to development and impacts on the urban working poor With a focus on street trading the book seeks to reframe the legal context in which modern informal economies operate drawing on key areas of academic inquiry and case studies of how vendors are staking claim to urban rights The book argues for a reconceptualisation of legal instruments to provide a rights based framework for urban work that recognises the legitimacy of urban informal economies the scope for collective management of urban resources and the social value of public space as a site for urban livelihoods It will be of interest to students and scholars of geography economics urban studies development studies political studies and law

*Urban Resettlements in the Global South* Raffael Beier, Amandine Spire, Marie Bridonneau, 2021-09-09 Urban Resettlements in the Global South provides new perspectives on resettlement through an urban studies lens To date resettlement has been theorised through development studies and refugee studies but urban resettlement is also a major dimension of urban development in the Global South and may help to rethink contemporary urban dynamics between spectacular new town developments and rising incidences of

eviction and displacement Conceptualising resettlement as a binding notion between production regeneration and destruction demolition of urban space helps to illuminate interdependencies and to underline significant ambiguities within affected people s perspectives towards resettlement projects This volume will offer an interesting selection of ten different case studies with rich empirical data from Latin America North and Sub Saharan Africa and Asia focused on each stage of resettlement before during after relocation through different timescales By offering a frame for analysing and rethinking resettlement within urban studies it will support any scholar or expert dealing with resettlement displacement and housing in an urban context seeking to improve housing and planning policies in and for the city New Perspectives in Caribbean Tourism Marcella Daye, Donna Chambers, Sherma Roberts, 2008-04-07 This volume explores tourism in the Caribbean one of the most tourism dependent regions of the world within the context of key currents of Caribbean thought and critique in relation to issues of dependency postcolonial interactions race and class as well as identity and culture **African Cities** Francesca Locatelli, Paul Nugent, 2009 Contemporary Africa is undergoing a period of unprecedented urban expansion which is throwing up new challenges in the provision of essential services and contentious questions about ownership of urban spaces This volume explores the interconnections between these processes whilst avoiding the tendency to forget that cities are also embedded in deeper historical processes that are integral to the framing of entitlements Histories of migrancy and the creation of urban stranger communities are fundamental in deciding who lives where and what this means materially and socially The gated communities that are springing up are often layered across older forms of urban segregation and or segmentation Urban water and food supply the management of urban land claims inequality and popular culture are closely examined From Local Action to Global Networks: Housing the Urban Poor Peter Herrle, Astrid Ley, 2016-03-09 Over the past two decades it has become widely recognized that housing issues have to be placed in a broader framework acknowledging that civil society in the form of Community Based Organizations CBOs and their allies are increasingly networking and emerging as strong players that cannot easily be overlooked Some of these networks have crossed local and national boundaries and have jumped political scales This implies that housing issues have to be looked at from new angles they can no longer simply be addressed through localized projects but rather at multiple scales The current debate is largely limited to statements about the relevance of individual organizations for local housing processes and tends to overlook the innovativeness in terms of re scaling those processes and of influencing institutional change at various levels by transcending national boundaries There is a significant lack of a systemic understanding of such globally operating grassroots networks and how they function in the housing process This book brings together different perspectives on multi scalar approaches within the housing field and on grassroots engagement with formal agencies including local government higher levels of government and international agencies By moving away from romanticizing local self initiatives it focuses on understanding the emerging potential once local initiatives are interlinked and scaled up to transnational networks
