| 1. Explain the difference between the following two types of sampling methods: simple random sampling and systematic sampling. In what circumstances would you use each method? In what circumstances would you use both methods in the same study? Give an example of a study in which you might use both methods. | Simple random sampling is a method of selecting a sample from a population where every member of the population has an equal chance of being selected. Systematic sampling is a method of selecting a sample from a population where every member of the population has an equal chance of being selected, but the selection is based on a fixed interval or pattern. |
